

CONTENTS

The Lamb Problem for an Inhomogeneous Elastic Half-Space	
A. G. Alenitsyn	1
§ 1. Formulation of the Problem	1
§ 2. Exact Solution	3
§ 3. Asymptotic Behavior of the Solutions of a System	3
§ 4. Geometry of Rays and Wave Fronts	11
§ 5. The Field in the Neighborhood of the Ordinary Fronts of the Longitudinal and Transverse Waves	12
§ 6. The Field in the Neighborhood of the Rayleigh Wave Front	16
§ 7. The Field in the Neighborhood of the Slip Fronts of the Longitudinal and Transverse Waves	18
§ 8. The Field in the Neighborhood of the Front of the Head Wave	20
§ 9. Formulas for the Axially Symmetric Lamb Problem	20
§ 10. Conclusions	22
Literature Cited	23
Stieltjes Double-Integral Operators	
M. Sh. Birman and M. Z. Solomyak	25
§ 1. Introduction	25
§ 2. Transformers of Class (S_2, S_2)	29
§ 3. Transformers of Class (S_1, S_q)	31
§ 4. Subsidiary Information About Stieltjes Integrals	36
§ 5. General Theorems on Transformers	43
§ 6. Some Remarks About Special Transformers	49
Literature Cited	53
The Inverse Problem in the Theory of Seismic Wave Propagation	
A. S. Blagoveshchenskii	55
Introduction	55
§ 1. The Inverse Problem for the String Equation	55
§ 2. The Inverse Seismic Problem	61
Literature Cited	67

The Trace Formulas and Some Asymptotic Estimates of the Resolvent Kernel of the Three-Dimensional Schroedinger Equation	
V. S. Buslaev	69
Introduction	69
§ 1. Asymptotic Estimates	70
§ 2. Calculations of $\text{Sp}(R_\lambda - R_\lambda^0)$	77
§ 3. Trace Formulas	82
Literature Cited	84
The Nonself-Adjoint Schroedinger Operator	
B. S. Pavlov	87
Introduction	87
§ 1. The One-Dimensional Schroedinger Operator	89
§ 2. Expansion Theorem	100
§ 3. The Three-Dimensional Schroedinger Operator	105
Literature Cited	113
