

# CONTENTS

The Asymptotic Behavior of "Quasi-Eigenvalues" of the Exterior Problem for the Laplace Operator V. M. Babich	1
Eigenfunctions Concentrated near a Closed Geodesic V. M. Babich and V. F. Lazutkin	9
Stieltjes Double-Integral Operators. II M. Sh. Birman and M. Z. Solomyak	19
Wave Propagation near the Curved Surface of an Inhomogeneous Body V. S. Buldyrev	47
Continuum Integrals and the Asymptotic Behavior of the Solutions of Parabolic Equations as $t \rightarrow 0$ . Applications to Diffraction V. S. Buslaev	67
Eigenvalues of the Perturbed Schroedinger Operator with a Periodic Potential V. A. Zheludev	87
Diffraction on a Convex Contour with Smoothly Varying Radius of Curvature and Impedance I. A. Molotkov	103
The Nonself-Adjoint Schroedinger Operator. II B. S. Pavlov	111
