

## CONTENTS

PREFACE	iii
CONTENTS	v
CHAPTER 0. INTRODUCTION	1
CHAPTER 1. A PRIORI BOUNDS	22
1. Introduction	22
2. Geometric Preliminaries	24
3. The Basic Inequality	27
4. A lower Bound for $(\nabla u)^2 \cdot \nabla \bar{u}$	32
5. Far-field Behavior of Coefficients of the $ Lu ^2$ and $ u ^2$ -terms	37
6. The Radiation Integral	39
7. A Priori Estimates in Weighted $L_2$ -norms	41
8. An A Priori Estimate for $ u(x, \lambda) $	45
CHAPTER 2. GLOBAL EXISTENCE, SMOOTHNESS, AND NONFOCUSSING OF OPTICAL PATHS IN A REFRACTIVE MEDIUM	48
1. Introduction	48
2. Ray Coordinate Systems and Convexity Relative to $n^{\frac{1}{2}}(x)$	52
3. An Existence Theorem	59
4. Solution of the Ray Equations	62
5. Existence of Ray Fields on Unbounded Domains	66
6. First Derivatives of $X$ and the Jacobian	77
7. Higher Derivatives of $X$	78
8. The Main Theorem	82
CHAPTER 3. A UNIFORM APPROXIMATION TO THE SOLUTION OF URSELL'S RADIATING BODY PROBLEM	84
1. Introduction	84
2. The Ansatz	87
3. Analysis of the $A^j$ and $B^{j-2}$	87
4. The Radiation Condition	92
5. General Obstacles	92
6. An Ansatz for More General Boundary Conditions	92
CHAPTER 4. EXISTENCE OF SOLUTIONS	98
INDEX	103
