

TABLE OF CONTENTS

Preface to the Russian Edition	iii
Preface to the English Edition	v
Chapter 0. Introduction	1
Chapter 1. Quasi-Periodic Solutions in Problems of Nonlinear Mechanics	5
§ 1. Statement of the Problem. The Existence of an Invariant Manifold	5
§ 2. Auxiliary Theorems	20
§ 3. Lemma on Iterations	27
§ 4. Theorem on Quasi-Periodic Solutions.	35
§ 5. Parametric Dependence of Quasi-Periodic Solutions. Asymptotic and Convergent Expansions	47
§ 6. Quasi-Periodic Solutions in Second Order Systems	54
Chapter 2. General Solutions of Nonlinear Differential Equations in the Neighbourhood of Quasi-Periodic Solutions	60
§ 7. Statement of the Problem	60
§ 8. Some Auxiliary Statements	63
§ 9. Inductive Theorem	68
§ 10. Iteration Process and its Convergence	73
§ 11. Theorem on Reducibility of Nonlinear Equations.	81
Chapter 3. A Smoothing Technique	88
§ 12. Loss of Derivatives	88
§ 13. Examples of Smoothing Operators	89
§ 14. The Basic Properties of a Smoothing Operator	92
§ 15. Iteration Process with Smoothing	97
Chapter 4. Trajectories on a Torus	99
§ 16. Behaviour of Trajectories on a Two-Dimensional Torus	99
§ 17. Behaviour of Trajectories on an m -Dimensional Torus	102
§ 18. Inductive Theorem	103
§ 19. Proof of the Theorem on the Reducibility of Equations on a Torus .	112

Chapter 5. Linear Systems with Quasi-Periodic Coefficients	121
§ 20. Reducibility Theorem	121
§ 21. Solution of the Auxiliary Equation	123
§ 22. Proof of Reducibility Theorem	128
§ 23. Construction of a Fundamental Matrix of Solutions	136
§ 24. The Measure of Reducible Systems. Statement of the Problem	145
§ 25. A Generalized Reducibility Theorem	147
§ 26. Metric Propositions	156
§ 27. Proof of the Measure Theorem	169
§ 28. Linear Systems with Smooth Right-Hand Sides	181
Chapter 6. Neighbourhood of an Invariant Smooth Toroidal Manifold	192
§ 29. Behaviour of Integral Curves in the Neighbourhood of Toroidal Manifolds	192
§ 30. Auxiliary Propositions	196
§ 31. Iteration Theorem	220
§ 32. Reducibility Theorem in the Neighbourhood of a Toroidal Manifold	226
§ 33. Behaviour under Perturbation of Integral Curves in the Neigh- bourhood of an Invariant Manifold	235
Chapter 7. Neighbourhood of a Compact Invariant Manifold of a Non- Autonomous System	243
§ 34. Statement of the Problem and Basic Postulates	243
§ 35. Lemma on the Solutions of an Auxiliary System	246
§ 36. Inductive Theorem	249
§ 37. Neighbourhood of an Invariant Manifold	261
§ 38. Behaviour of Solutions of a System of Two Equations in the Neighbourhood of Equilibrium Positions	266
Appendices I to XV	269
References	288
