

## CONTENTS

<i>Preface</i>	page ix
<i>Introduction</i>	xi

### PART I. AUXILIARY MATHEMATICS

#### *Chapter 1. THE EQUATION OF TRANSFER*

1	Introduction	1
2	Notation	1
3	The equation of transfer	4
4	Finite atmospheres	5
5	Semi-infinite atmospheres	6
6	The net flux	9
7	The $K$ -integral	11

#### *Chapter 2. THE $H$ -FUNCTIONS*

8	Introduction	13
9	The characteristic equation	14
10	The functional relation	16
11	The solution of the $H$ -equation	17
12	The moments of $H(\mu)$	24

#### *Chapter 3. INTEGRAL OPERATORS*

13	Introduction	27
14	The functions $E_n(t)$ and $K_n(t)$	27
15	Properties of the operators $L$ and $\bar{L}$	29

### PART II. MILNE EQUATIONS

#### *Chapter 4. ITERATIVE SOLUTIONS*

16	Introduction	35
17	The homogeneous Milne equation ( $\psi_0 = \frac{1}{2}$ )	35
18	Uniqueness	37
19	The non-homogeneous equation	39

#### *Chapter 5. THE WIENER-HOPF SOLUTION*

20	Introduction	47
21	The Laplace transforms (20.4)	48

22	The homogeneous Milne equation	<i>page</i> 49
23	The definitive form for $J(\tau)$	55
24	The derivatives of $J(\tau)$	59
25	The Milne equation $(1 - \omega_0 \Lambda)_\tau \{J(t)\} = 0$	60

*Chapter 6. SOLUTIONS OF THE NON-HOMOGENEOUS EQUATION*

26	Introduction	62
27	The auxiliary equation (26.5)	63
28	The reduction to the $H$ -equation	67
29	The solution of $(1 - L)_\tau \{\mathfrak{J}(t)\} = \sum_{\nu=0}^n a_\nu \tau^{n-\nu} / (n - \nu)!$	70
30	The solution of $(1 - L)_\tau \{\mathfrak{J}(t)\} = K_n(\tau)$	77

*Chapter 7. FINITE ATMOSPHERES:  
PRELIMINARY RESULTS*

31	Introduction	80
32	Further properties of the operator $\bar{L}$	80
33	The homogeneous equation	83
34	The non-homogeneous equation	83
35	The derivative of the solution of a Milne equation	85

*Chapter 8. THE X- AND Y-FUNCTIONS*

36	Introduction	88
37	The auxiliary equation	88
38	Properties of the $X$ - and $Y$ -functions	93
39	Uniqueness	99
40	Other integral equations for $X(\mu)$ and $Y(\mu)$	101

*Chapter 9. FINITE ATMOSPHERES:  
FURTHER RESULTS*

41	The $\tau_1$ -transforms	104
42	The solution of $(1 - \bar{L})_\tau \{\mathfrak{J}(t)\} = \sum_{r=0}^n a_r \tau^{n-r} / (n - r)!$	105
43	The solution of $(1 - \bar{L})_\tau \{\mathfrak{J}(t)\} = K_n(\tau)$	110

*Chapter* 10. ANISOTROPIC SCATTERING

44	Introduction	<i>page</i> 113
45	Preliminary formulae	115
46	The homogeneous equation	116
47	The auxiliary equation	120
48	The reduction to an <i>H</i> -function	122
49	The law of diffuse reflexion	131

## APPENDIX

## NOTES ON FURTHER PROBLEMS

50	Polarization	134
51	Inhomogeneous atmospheres	134
52	The formation of absorption lines	135
53	Time-dependent problems	136
54	Spherical atmospheres	137
	<i>References</i>	138
	<i>General index</i>	141
	<i>Index of notations</i>	143
