

Contents

1. Introduction

1.1 Why Study Solitons?	1
1.2 Basic Concepts Illustrated by Simple Examples	6

2. The Korteweg-de Vries Equation (KdV-Equation)

2.1 The Physical Meaning of the KdV Equation	12
2.2 The KdV Equation as a Lagrangian Field Theory: Symmetries	14
2.3 Local Conservation Laws for the KdV System	18
2.4 Simple Solutions of the KdV Equation	21

3. The Inverse Scattering Transformation (IST) as Illustrated With the KdV

3.1 The Linear Eigenvalue Problem	27
3.2 Commutation Relations for $(\text{KdV})_n$	29
3.3 Inverse Scattering Theory of Gel'fand-Levitan-Marchenko	31
3.4 Application to the KdV Equation: N Soliton Solution	40
3.5 Squared-Function Systems, or: the Secret of the KdV Equation ...	44
3.6 Dynamics of the Scattering Data	47
3.7 Birth and Death of Solitons	51

4. Inverse Scattering Theory for Other Evolution Equations

4.1 Statement of the Problem	54
4.2 Inverse Scattering Theory for Equation (4.1.1)	58
4.3 Orthogonal Systems of Functions, Associated Operators, and Induced Poisson Brackets	60
4.4 Further Nonlinear Evolution Equations	65

4.5 The Simplest Nonpolynomial "Dispersion Relations"	67
4.6 Time Development of the Scattering Data	69
4.7 Transformation Theory: Miura and Bäcklund Transformations	74
4.8 Perturbation Theory and Stability	83
4.9 Summary of Results, Problems, and Simple Extension to Higher Dimensions	87
 <u>5. <i>The Classical Sine-Gordon Equation (SGE)</i></u>	
5.1 Basic Equations	93
5.2 Soliton Solutions of the SGE	96
5.3 Simple Solutions of the PSG	99
5.4 Cauchy Problem for the PSG and Particle Representation	115
5.5 PSG Solitons in the Presence of External Perturbations	120
5.6 Possible Generalizations	125
 <u>6. <i>Statistical Mechanics of the Sine-Gordon System</i></u>	
6.1 Functional Integrals	128
6.2 Partition Function in the Soliton Picture	133
6.3 Partition Function by a Scale Transformation	137
 <u>7. <i>Difference Equations: The Toda Lattice</i></u>	
7.1 Basic Considerations	140
7.2 IST for the Toda Lattice	146
7.3 Systems of Squared Functions	150
7.4 Soliton Solutions for the Toda Lattice	155
 <u>Appendix: Mathematical Details</u>	159
 <u>References</u>	185
 <u>Subject Index</u>	191
