Contents

Preface iii

Contributors vii

PART I

1. Chaostrophes, Intermittency, and Noise 3
   Ralph H. Abraham

2. The Outstructure of the Lorenz Attractor 23
   Ralph H. Abraham and Christopher C. Shaw

3. Chaos and Intermittency in an Endocrine System Model 33
   Ralph H. Abraham, Hüseyin Koçak, and William R. Smith

4. An Index for Chaotic Solutions in Cooperative Peeling 71
   Okan Gurel

5. Unfoldings of Degenerate Bifurcations 87
   W. F. Langford

6. Example of an Axiom A ODE 105
   Otto E. Rössler

PART II

7. Is There Chaos Without Noise? 117
   Ralph H. Abraham

8. Chaostrophes of Forced Van der Pol Systems 123
   Ralph H. Abraham and Katherine A. Scott

9. Numerical Solution of the Lorenz Equations with Spatial Inhomogeneity 135
   M. E. Alexander, J. Brindley, and I. M. Moroz

10. Some Results on Singular Delay-Differential Equations 161
    Shui-Nee Chow and David Green, Jr.

11. Feigenbaum Functional Equations as Dynamical Systems 183
P. Fischer

12. The Chaos of Dynamical Systems 189
Morris W. Hirsch

13. On Network Perturbations of Electrical Circuits and Singular Perturbation of Dynamical Systems 197
Gikō Ikegami

14. On the Dynamics of Iterated Maps III: The Individual Molecules of the M-Set, Self-Similarity Properties, the Empirical n^2 Rule, and the n^2 Conjecture 213
Benoit B. Mandelbrot

15. On the Dynamics of Iterated Maps IV: The Notion of "Normalized Radical" R of the M-Set, and the Fractal Dimension of the Boundary of R 225
Benoit B. Mandelbrot

16. On the Dynamics of Iterated Maps V: Conjecture That the Boundary of the M-Set Has a Fractal Dimension Equal to 2 235
Benoit B. Mandelbrot

17. On the Dynamics of Iterated Maps VI: Conjecture That Certain Julia Sets Include Smooth Components 239
Benoit B. Mandelbrot

18. On the Dynamics of Iterated Maps VII: Domain-Filling ("Peano") Sequences of Fractal Julia Sets, and an Intuitive Rationale for the Siegel Discs 243
Benoit B. Mandelbrot
