

TABLE OF CONTENTS

PART I

Preface	vii
The 1986 Wigner Medal Ceremony Honoring Feza Gürsey — Introductory Remarks <i>A. Bohm</i>	xix
Tribute to Feza Gürsey <i>R. Haag</i>	xxi
Laudatio for Feza Gürsey on the Occasion of the Award of the Wigner Medal, October 22, 1986 <i>R. Haag</i>	xxiii
Rotational Symmetry Analysis for Semiclassical and Quantum Mechanics <i>W.G. Harter</i>	1
Algebraic Approach to Molecular Spectra and Dynamics <i>R.D. Levine</i>	28
Dynamical Symmetries in Nuclear Structure <i>R.F. Casten</i>	40
The Fermion Dynamical Symmetry Model and Nuclear Structure <i>C.L. Wu</i>	68
Group Theory Approach to Scattering <i>F. Iachello</i>	94
Algebraic Methods in Medium Energy Scattering from Nuclei and Molecules <i>R.D. Amado</i>	112
On the Group Theoretical Approach to Scattering <i>L.C. Biedenharn & A. Stahlhofen</i>	134
“DAS PENTAGRAMMA MACHT DIR PEIN?” Violation of Periodic Symmetry in Quasicrystals <i>P. Kramer</i>	146

The Growth of Quasicrystals <i>V. Elser</i>	162
Hausdorff Dimension of Irrational Windings <i>P. Cvitanović</i>	184
Number of Periodic Windows in One-Dimensional Mappings <i>B.L. Hao & W.Z. Zeng</i>	199
Generalized Symmetries <i>P.J. Olver</i>	216
What is New in the Study of Differential Equations by Group Theoretical Methods? <i>P. Winternitz</i>	229
Approximate Global Symmetries of the Electroweak Interactions <i>H. Georgi</i>	249

PART II

QUASICRYSTALS

Quasi-Lattices Associated with Arbitrary Groups: Application to Icosahedral and Dihedral Groups <i>R.W. Haase & P. Kramer</i>	258
Symmetry and Subgroups of the Regular Tetrahedron in 4-Dimensions <i>S. Deonaraine & J.L. Birman</i>	264
Symmetry of Quasiperiodic Lattices and Decomposability of Crystallographic Point Groups <i>J.P. Lu & J.L. Birman</i>	270
Tensorial Properties Distinguishing Icosahedral Symmetry from Cubic or Isotopic $SO(3)$ Symmetry <i>S.Y. Goshen & J.L. Birman</i>	278
Symmetry and Phase Transitions in Decagonal Quasicrystals <i>D.B. Litvin, V. Kopsky & J.L. Birman</i>	282
Group Theory and Elasticity of Quasicrystals <i>M.V. Jarić</i>	288

ALGEBRAIC MODELS

- Dynamical Group Approach to Certain Anharmonic Oscillator and Perturbed Coulomb Potentials
H. De Meyer, G. Vanden Berghe & V. Fack 294
- Symmetry-Conserving Higher-Order Interaction Terms in the I.B.A.-Model: The $O(6)$ Limit
G. Vanden Berghe, J. Vanthournout, J. Van der Jeugt & H. De Meyer 299
- Classification of Symmetry Preserving Cubic Interactions in the Interacting Boson Model
H. De Meyer & J. Van der Jeugt 304
- Algebraic Foundation for the Triaxial Rotor
J.P. Draayer & Y. Leschber 309
- Spin Quenching and the SO_8 and SP_6 Fermion Models of Collective Motion
J.N. Ginocchio 315
- The $U(6, 1)$ Model of Pairing and Quadrupole Collectivity
G. Rosensteel 319
- Theorem on the Schwinger Representations of Lie Groups and its Application to the Algebraic Hamiltonian for Diatomic Molecules
S.K. Kim 325
- Group Theoretical Techniques for Molecular Electronic Spectra
R. Lemus, A. Frank & F. Iachello 330
- An Algebraic Approach to Collision Dynamics of Composite Projectiles
M. Berman & R.D. Levine 336
- The Algebraic Method for Relativistic Systems — Spectrum and Radiative Transitions
A. Bohm, M. Loewe & P. Magnollay 344
- Dynamical $SU(8)$ — A Laboratory for Phase Coexistence
A.I. Solomon & J.L. Birman 352
- Discrete Symmetries and Selection Rules in Unified $SU(8)$ for Superconductivity and Density Waves
J.L. Birman & A.I. Solomon 357

GROUP THEORETICAL MODELS

- The Diamond Solvable Lie Group and Fiber Optical
Communication Systems** 363
W. Schempp
- Dynamical Groups in Lie Optics** 374
K.B. Wolf
- Symmetries of Linear Newtonian Systems** 380
A. González López
- SU(1, 1) Coherent States and Squeezed Light Interacting with an
Anharmonic Oscillator** 386
C.C. Gerry
- Symplectic Decomposition of Reaction Channels** 391
P. Kramer & Z. Papadopolos
- Group Theoretical Approach to Squeezed States Using
Generalized Bose Operators** 399
J. Katriel, M. Rasetti & A.I. Solomon
- “Hidden Symmetries” and Stereographic Projection in Rank One
Symmetric Spaces** 404
R. Perline

GROUP THEORY AND S-MATRICES

- Properties of the Strong Factor in Dynamically Generated S-Matrices** 407
R.D. Amado & D.A. Sparrow
- Group Deformations and Dynamic Symmetries in Scattering Systems** 413
A. Frank
- Group Contraction and the Algebraic Approach to Scattering** 419
E. Celeghini, F. Iachello, M. Tarlini & G. Vitiello

SPECIAL FUNCTIONS AND DIFFERENTIAL EQUATIONS

- Symmetries for Some Hypergeometric Series: Implications for $3j$ - and
 $6j$ -Coefficients** 428
J.D. Louck, W.A. Beyer, L.C. Biedenharn & P.R. Stein

Nonlinear Differential Equations with Superposition Laws for the $\mathfrak{osp}(1, 2)$ Superalgebra <i>L. Gagnon, J. Beckers, V. Hussin & P. Winternitz</i>	435
Symmetry Groups of Partial Differential Equations Associated with Vector-Valued Differential Forms <i>C.J. Papachristou & B.K. Harrison</i>	440
Horizontal Lin Constraints, Clebsch Potentials and Variational Principles on Principal Fiber Bundles <i>H. Cendra, L.A. Ibort & J.E. Marsden</i>	446
Symmetry Reduction for the Kadomtsev-Petviashvili Equation and its Bäcklund Transformation <i>D. David</i>	451
Hierarchies of Symmetries and Conserved Functionals of the Federbush Model <i>P.H.M. Kersten</i>	457
GROUP THEORETICAL RESULTS	
Levi-Civita, Kustaanheimo-Stiefel and Other Transformations <i>D. Lambert & M. Kibler</i>	475
Spin Structure, Projection Operators, and Bose-Fermi Equivalence on the 2d Torus for Simply Laced Groups <i>A.N. Redlich</i>	481
Representation of the Generators of Symplectic Algebras <i>E. Chacón & M. Moshinsky</i>	486
A New Perspective on the $U(n)$ Wigner-Racah Calculus <i>R. LeBlanc & K.T. Hecht</i>	491
$SU(n)$ Representation Theory in Terms of Pseudo-Unitary Groups <i>C. Quesne</i>	497
Explicit Expression for the Product of the Class of Transpositions with an Arbitrary Class of the Symmetric Group <i>J. Katriel & J. Paldus</i>	503

Recent Results on Group Decompositions and Some Applications <i>J. Hebda & P. Moylan</i>	507
Representations of the Lie Superalgebra $G(3)$ <i>A. Sciarrino & P. Sorba</i>	513
On Principal Subalgebras of Lie Superalgebras and Unimodality <i>J. Van der Jeugt</i>	522
QUANTUM FIELD THEORY	
Generally Covariant Quantum Field Theory <i>R. Haag</i>	527
On the Covariant Representation of Global Quantum Dynamics and its Symmetries <i>A. Rieckers</i>	529
Quantum De Sitter Structured Connection and an Example: The Quantum Relativistic Rotator <i>R.R. Aldinger</i>	534
Integral-Spin Fields on $3+2$ De Sitter Space <i>J.P. Gazeau & M. Hans</i>	540
A Phase-Space Formalism for Quantized Fields <i>G. Kaiser</i>	546
Unitary Representations of Diffeomorphism Groups and Unusual Particle Statistics <i>G.A. Goldin</i>	552
Unitary Representations of Photon Polarization Vectors <i>D. Han, Y.S. Kim & M.E. Noz</i>	558
Non-Linear Representations of the Poincare Group in 3 and 4 Space-Time Dimensions <i>G. Rideau</i>	563
Differential Geometry and Gauge Structure of Maximal-Acceleration Invariant Phase Space <i>H.E. Brandt</i>	569

New Geometric Symmetries via Nonlinear Realizations <i>B.J. Dalton</i>	578
ELEMENTARY PARTICLE PHYSICS	
Neutrino Mass and Double Beta Decay <i>B. Kayser</i>	584
Applications of the Three-Dimensional " ϕ^6 "-Model to Structural Phase Transitions <i>A.M. Grundland, J.A. Tuszynski & P. Winternitz</i>	589
Infinite Dimensional Lie Algebras Acting on the Solution Space of σ Models with a Wess-Zumino Term <i>Y. Saint-Aubin</i>	601
Relationship Between Supersymmetry and Solvable Potentials <i>F. Cooper, J.N. Ginocchio & A. Khare</i>	608
Effective Quark-Diquark Supersymmetry and the Splitting of the Regge Trajectories <i>S. Catto & S. Kuyucak</i>	615
$N = 2$ Superconformal Quantum Harmonic Oscillator <i>D. Dehin</i>	621
Superspace Formulation of 10-D SUGRA+SYM Theory a la Green-Schwarz <i>L. Bonora, P. Pasti & M. Tonin</i>	627
Parastring Theories <i>F. Mansouri</i>	633
Q_{BRST} and Negative Norm States: An Application to the Bosonic String <i>M. Spiegelglas</i>	639
Orthonormal Gauge and Affine Geometry in String Theory <i>B.H. Cho & Y.S. Myung</i>	647
Non-Compact Symmetric Spaces in Current Particle Theories <i>Y.K. Ha</i>	651
Superinvariant Chiral Fields <i>H. Panagopoulos & L. Vinet</i>	654

Bag Formation in a Chiral Model <i>P. Jain</i>	662
Derivation of Dirac's Bispinor Equation from a Yang-Mills Lagrangian <i>R. Morris & F. Reifler</i>	672
Nonholonomic Systems with Symmetry (and a Model for a Classical Particle on a Yang-Mills Field) <i>J. Koiller</i>	676
3-Cocycles in the Monopole Sector of Gauge Theories <i>I. Bakas & D. McMullan</i>	680
A Polynomial Link Invariant, Braid Groups and the XXZ Chain <i>R.R. Carr</i>	686
Spin(8) Representations and Particle Physics <i>F.D. Smith</i>	694
On Different Symmetries of Mesons and Baryons <i>B.J. Bhattacharjee</i>	700
The Announcement: The Solution for the Measurement Problem in Quantum Mechanics <i>J. Yoshimura</i>	704
SPACE GROUPS	
Isotropy Subgroups for Reducible Representations of Space Groups <i>D.M. Hatch & H.T. Stokes</i>	710
On Space Groups with Q-Reducible Point Groups <i>V. Kopsky & D.B. Litvin</i>	716
Physical Applications of Compatibility Relations for Space Group Clebsch-Gordan Coefficients <i>R. Dirl & B.L. Davies</i>	722
Various Classification Schemes for Irreducible Space Group Representations <i>B.L. Davies & R. Dirl</i>	728

The Auxiliary Group Approach to the Reduction of Multiple Kronecker Products and to Chain-Adapted Reducing Matrices <i>M.I. Aroyo, J.N. Kotzev, R. Dirl, P. Kasperkovitz & B.L. Davies</i>	734
On the 6D-Symbols for Corepresentations of Antiunitary Magnetic Groups <i>M.N. Angelova, M.K. Peev, M.I. Aroyo & J.N. Kotzev</i>	739
GRAPE — Group Representation and Application in Physics Environment <i>C. Zhan, J.M. Gao and B.L. Hao</i>	745
List of Participants	751
