	Page
Preface	v
CHAPTER I. INTRODUCTION AND PRELIMINARIES	1
§1. Optimization Problems	1
§2. Some Mathematical Prerequisites	5
§3. Linear Optimization Problems	10
CHAPTER II. WEAK DUALITY	20
§4. Duality Lemma and Dual Problem	20
§5. State Diagrams and Duality Gaps	30
CHAPTER III. APPLICATIONS OF WEAK DUALITY IN UNIFORM APPROXIMATION	37
§6. Uniform Approximation	37
§7. Polynomial Approximation	46
CHAPTER IV. DUALITY THEORY	58
§8. Geometric Interpretation of the Dual Problem	58
§9. Solvability of the Dual Problem	69
§10. Separation Theorem and Duality	75
§11. Supporting Hyperplanes and Duality	82
CHAPTER V. THE SIMPLEX ALGORITHM	92
§12. Basic Solutions and the Exchange Step	93
§13. The Simplex Algorithm and Discretization	105
CHAPTER VI. NUMERICAL REALIZATION OF THE SIMPLEX ALGORITHM	115
§14. Stable Variants of the Simplex Algorithm	115
§15. Calculating a Basic Solution	128
CHAPTER VII. A GENERAL THREE-PHASE ALGORITHM	134
§16. Nonlinear Systems Derived From Optimality Conditions	135
§17. A General Computational Scheme	141
CHAPTER VIII. APPROXIMATION PROBLEMS BY CHEBYSHEV SYSTEMS	153
§18. General Properties of Chebyshev Systems	153
§19. One-sided Approximation and Generalized Quadrature Rules of the Gaussian Type	158
§20. Computing the Best Approximation in the Uniform Norm	168
CHAPTER IX. EXAMPLES AND APPLICATIONS OF SEMI-INFINITE PROGRAMMING	175
§21. A Control Problem with Distributed Parameters	175
§22. Operator Equations of Monotonic Type	181
§23. An Air Pollution Abatement Problem	184
§24. Nonlinear Semi-Infinite Programs	188
References	193
Index	196
