

TABLE OF CONTENTS

1.	INTRODUCTION AND GENERAL REFERENCES	4
2.	GENERAL DEFINITION AND PROPERTIES OF ANGULAR MOMENTUM OPERATORS	5
2-1	Definition of Angular Momentum Operators	5
2-2	Commutation Relations	7
2-3	The Total Angular Momentum Operator	8
2-4	Eigenvalues of \vec{J}^2 and J_Z	9
2-5	Matrix Elements of J_X and J_Y in a Representation with \vec{J}^2 and J_Z Diagonal	12
3.	VECTOR ADDITION OF ANGULAR MOMENTA: CLEBSCH-GORDAN COEFFICIENTS	15
3-1	Definition of Clebsch-Gordan Coefficients	15
3-2	Orthogonality Relations Satisfied by C-Coefficients	20
3-3	Explicit Expression for C-Coefficients	21
3-4	Symmetry Relations among C-Coefficients and Applications	23
4.	REPRESENTATIONS OF THE THREE DIMENSIONAL ROTATION GROUP	27
4-1	Introduction	27
4-2	The Representations $D^{(\ell)}$, $\ell = 0, 1, 2, \dots$	28
4-3	Connection between (\vec{n}, θ) and $(\alpha \beta \gamma)$	30
4-4	Some Explicit Expressions for the D's	33
4-5	The Clebsch-Gordan Series	37
4-6	Relations between the D's and Y_{ℓ}^m 's	40
5.	IRREDUCIBLE TENSORS	43
5-1	Introduction	43
5-2	First Rank Tensors: Spherical Basis	45
5-3	Generalized Irreducible Tensors	47
5-4	Construction of Tensors of Higher and Lower Rank from Tensors of a given Rank	48
5-5	Racah's Definition of Irreducible Tensor Operators	49
5-6	The Wigner-Eckart Theorem	50
5-7	Spin 1 Fields	53

TABLE OF CONTENTS (continued)

6.	RACAH COEFFICIENTS	61
	6-1 Introduction	61
	6-2 Relation between Clebsch-Gordan and Racah Coefficients	62
	6-3 Properties of the Racah Coefficients	65
	6-4 An Application	67
7.	THE ELECTROMAGNETIC FIELD: MULTIPOLE FIELDS	71
	7-1 Maxwell's Equations: The Equations Satisfied by the Vector Potential	71
	7-2 Multipole Fields	72
	7-3 Expansion of a Circularly Polarized Plane Wave Into Multipole Fields	78
	7-4 Selection Rules	82
8.	EMISSION OF γ-RAYS FROM ORIENTED NUCLEI	83
	8-1 Introduction	83
	8-2 Expression for the Transition Probability in Terms of Statistical Tensors	83
	8-3 Statistical Tensors	89
	8-4 Dependence of Total Intensity on Polarization, Etc.	95
	8-5 Cascade Processes: Orientation of Intermediate Nucleus	99
9.	β-DECAY FROM ORIENTED NUCLEI	103
	9-1 Introduction	103
	9-2 General Expression for Transition Probability	107
	9-3 β -Emission from Oriented Nuclei	111
	9-4 Polarization of Residual Nucleus Following β -decay from Oriented Nucleus	115
	9-5 Further Discussion of Polarization Parameters or Residual Nucleus Using 9-j Symbols	124
	APPENDIX 1: Sums Over Five C-Coefficients	133
	APPENDIX 2: Coupling of 4 Angular Momenta: 9-j Symbols	139
