

CONTENTS

Foreword	v
--------------------	---

• Chapter 1 •

Classical Statistical Mechanics

Introduction	3
The Takahashi Nearest-Neighbor Gas	5
The Kac-Baker Model	9
The Coulomb Gas and the Statistical Theory of Energy Levels	14
Bibliography	22

Reprinted papers

A Simple Method for Treating the Statistical Mechanics of One-Dimensional Substances

H. Takahashi <i>Proc. Phys.-Math. Soc. Japan</i> 24, 60 (1942)	25
---	----

Sur l'Intégrale de Configuration pour les Systèmes de Particules à Une Dimension

L. Van Hove <i>Physica</i> 16, 137 (1950)	28
--	----

Molecular Distribution Functions in a One-Dimensional Fluid

Z. W. Salsburg, R. W. Zwanzig, and J. G. Kirkwood <i>J. Chem. Phys.</i> 21, 1098 (1953)	35
--	----

Certain General Order-Disorder Models in the Limit of Long-Range Interactions

G. A. Baker, Jr. <i>Phys. Rev.</i> 126, 2071 (1962)	45
--	----

On the van der Waals Theory of the Vapor-Liquid Equilibrium.

I. Discussion of a One-Dimensional Model

M. Kac, G. E. Uhlenbeck, and P. C. Hemmer <i>J. Math. Phys.</i> 4, 216 (1963)	53
--	----

On the van der Waals Theory of the Vapor-Liquid Equilibrium.

III. Discussion of the Critical Region

P. C. Hemmer, M. Kac, and G. E. Uhlenbeck

J. Math. Phys. 5, 60 (1965) 66

One-Dimensional Phase Transition in the Spherical Model of a Gas

H. A. Gersch

Phys. Fluids 6, 599 (1963) 81

Exact Statistical Mechanics of a One-Dimensional System with Coulomb Forces

A. Lenard

J. Math. Phys. 2, 682 (1961) 91

One-Dimensional Plasma Model at Thermodynamic Equilibrium

O. C. Eldridge and M. Feix

Phys. Fluids 5, 1076 (1962) 103

Statistical Mechanics of a One-Dimensional Coulomb System with a Uniform Charge Background

R. J. Baxter

Proc. Camb. Phil. Soc. 59, 779 (1963) 108

• Chapter 2 •

The Disordered Chain of Harmonic Oscillators

Introduction	119
Dyson's Method	120
Other Rigorous Solutions	124
Special Theorems.	126
Bibliography	129

Reprinted papers

The Dynamics of a Disordered Linear Chain

F. J. Dyson

Phys. Rev. 92, 1331 (1953) 132

Disordered One-Dimensional Crystals

H. Schmidt

Phys. Rev. 105, 425 (1957). 140

Special Frequencies in the Vibrational Spectra of Disordered Chains

H. Matsuda

Progr. Theoret. Phys. (Kyoto) 31, 161 (1964). 157

Some Exact Results for the Vibrational Spectrum of a Disordered Chain

R. E. Borland

Proc. Phys. Soc. (London) **83**, 1027 (1964) 159

Structure of the Spectra of Disordered Systems.

I. Fundamental Theorems

J. Hori and H. Matsuda

Progr. Theoret. Phys. (Kyoto) **32**, 183 (1964). 165

The Vibrational Spectrum of a Disordered Linear System

R. L. Agacy

Proc. Phys. Soc. (London) **83**, 591 (1964) 172

Vibrations of Glass-Like Disordered Chains

P. Dean

Proc. Phys. Soc. (London) **84**, 727 (1964) 178

Theory of Normal Vibrations of Chain Molecules with Finite Length

H. Matsuda, K. Okada, T. Takase, and T. Yamamoto

J. Chem. Phys. **41**, 1527 (1964) 196

• Chapter 3 •

Electron Energy Bands in Ordered and Disordered Crystals

General Considerations about Periodic Structures	213
Special Periodic Structures	216
Slight Deviations from Periodicity	217
Large Deviations from Periodicity	218
Bibliography	221

Reprinted papers

The Approximate Solution of One-Dimensional Wave Equations

C. Eckart

Rev. Mod. Phys. **20**, 399 (1948) 224

Quantum Mechanics of Electrons in Crystal Lattices

R. de L. Kronig and W. G. Penney

Proc. Roy. Soc. (London) **A130**, 499 (1931) 243

New Soluble Energy Band Problem

F. L. Scarf

Phys. Rev. **112**, 1137 (1958) 258

Energy Bands and Wave Functions in Periodic Potentials

H. M. James

Phys. Rev. **76**, 1602 (1949) 262

Wave Propagation in One-Dimensional Structures

J. M. Luttinger

Philips Res. Rept. 6, 303 (1951)

271

Analytic Properties of Bloch Waves and Wannier Functions

W. Kohn

Phys. Rev. 115, 809 (1959)

279

A Theory of the Electrical Breakdown of Solid Dielectrics

C. Zener

Proc. Roy. Soc. (London) 145, 523 (1934)

292

Electron Levels in a One-Dimensional Random Lattice

H. L. Frisch and S. P. Lloyd

Phys. Rev. 120, 1175 (1960)

299

Existence of Energy Gaps in One-Dimensional Liquids

R. E. Borland

Proc. Phys. Soc. (London) 78, 926 (1961)

314

The Electronic Structure of a One-Dimensional Random Alloy

R. L. Agacy and R. E. Borland

Proc. Phys. Soc. (London) 84, 1017 (1964)

320

Existence of Energy Gaps in the Spectrum of a One-Dimensional Atomic Chain

L. Dworin

Phys. Rev. 138, A1121 (1965)

330

• Chapter 4 •**The Many-Fermion Problem**

Introduction	339
Tomonaga's Model	339
Exactly Soluble Model	342
Is Perturbation Theory Valid?	343
Delta-Function Model	344
Lack of Ferromagnetism in One Dimension	345
General	346
Field Theory	346
Bibliography	347

Reprinted papers**Remarks on Bloch's Method of Sound Waves Applied to Many-Fermion Problems**

S. Tomonaga

Progr. Theoret. Phys. (Kyoto) 5, 544 (1950)

349

Exact Solution of a Many-Fermion System and Its Associated Boson Field

D. C. Mattis and E. H. Lieb

J. Math. Phys. 6, 304 (1965)

375

Theory of Ferromagnetism and the Ordering of Electronic Energy Levels

E. Lieb and D. Mattis

Phys. Rev. 125, 164 (1962)

384

• Chapter 5 • The Bose Gas

Introduction 395

Bibliography 402

Reprinted papers

Exact Analysis of an Interacting Bose Gas.

I. The General Solution and the Ground State

E. H. Lieb and W. Liniger

Phys. Rev. 130, 1605 (1963)

404

Exact Analysis of an Interacting Bose Gas.

II. The Excitation Spectrum

E. H. Lieb

Phys. Rev. 130, 1616 (1963)

416

Momentum Distribution in the Ground State of the One-Dimensional System of Impenetrable Bosons

A. Lenard

J. Math. Phys. 5, 930 (1964)

425

Study of Exactly Soluble One-Dimensional N-Body Problems

J. B. McGuire

J. Math. Phys. 5, 622 (1964)

439

• Chapter 6 • Magnetism

Origins of the Magnetic Force 457

Algebra of Spin Operators 458

Ferromagnetic Heisenberg Chain 460

Antiferromagnetic Heisenberg Chain 460

Some Exactly Soluble Models 462

Applications of One-Dimensional Theories 464

Bibliography 464

Reprinted papers**Two Soluble Models of an Antiferromagnetic Chain**

E. Lieb, T. Schultz, and D. Mattis

Ann. Phys. (N.Y.) 16, 407 (1961) 466**Linear Magnetic Chains with Anisotropic Coupling**

J. C. Bonner and M. E. Fisher

Phys. Rev. 135, A640 (1964) 487**Spin-Wave Spectrum of the Antiferromagnetic Linear Chain**

J. des Cloizeaux and J. J. Pearson

Phys. Rev. 128, 2131 (1962) 506**Magnetization Curve at Zero Temperature for the Antiferromagnetic Heisenberg Linear Chain**

R. B. Griffiths

Phys. Rev. 133, A768 (1964) 511

• Chapter 7 •

Time-Dependent Phenomena

Introduction 521

Bibliography 522

Reprinted papers**Statistical Mechanics of Assemblies of Coupled Oscillators**

G. W. Ford, M. Kac, and P. Mazur

J. Math. Phys. 6, 504 (1965) 524**Dynamics of a Simple Many-Body System of Hard Rods**

D. W. Jepsen

J. Math. Phys. 6, 405 (1965) 536**Equipartition of Energy for Nonlinear Systems**

J. Ford

J. Math. Phys. 2, 387 (1961) 545**Computer Studies of Energy Sharing and Ergodicity for Nonlinear Oscillator Systems**

J. Ford and J. Waters

J. Math. Phys. 4, 1293 (1963) 552
