

Contents

Circle Mappings
By O.E. Lanford III 1

Dirac's Theory of Constraints
By C.A. Hurst 18

Some Properties of Bound States in Potentials
By A. Martin 53

Wiener Measure Regularization for Quantum Mechanical Path Integrals
By J.R. Klauder 80

Schrödinger Operators with Random and Almost Periodic Potentials
By B. Simon 100

The Dynamical Entropy of Quantum Systems
By A. Connes, H. Narnhofer, and W. Thirring 102

Hamiltonian Approach to the Theory of Anomalies
By L. Faddeev 137

Phase Space Expansions in Quantum Field Theory
By J. Feldman 160

Berezin's Pseudodifferential Forms
By J. Wess 184

Classical Non-Linear σ -Models on Grassmann Manifolds
By J.-P. Antoine and B. Piette (With 2 Figures) 191

On Relativistic Irreducible Quantum Fields Fulfilling CCR
By K. Baumann 196

Krein's Spectral Shift Function and Supersymmetric Quantum Mechanics
By D. Bollé 201

Lattice Gauge Theories with Continuous Time and Decimation
By Ch. Borgs (With 2 Figures) 207

Some Aspects of the Boson-Fermion (In-) Equivalence
By P. Garbaczewski 214

<i>Optimization of Real-Space Renormalization-Group Transformations</i> By H. Gausterer and C.B. Lang	219
<i>Finding Quarkonia in QCD Vacuum</i> By St. Glazek	224
<i>Quantization of Fermions in External Soliton Fields</i> By H. Grosse	229
<i>Resolution of the $U(1)$ Problem by Lattice Gauge Theory</i> By J. Hoek (With 2 Figures)	234
<i>On some Recent Results for Conservation Laws in One Dimension</i> By H. Holden	240
<i>Some Recent Results on Stark Effect Hamiltonians</i> By A. Jensen	245
<i>Conformal Properties of Integrable Models</i> By M. Karowski	249
<i>Generating Functionals of 1PI-Green Functions in Gauge Field Theories</i> By M. Bordag, L. Kaschluhn, V.A. Matveev, and D. Robaschik	256
<i>From Thirring's Charge Renormalization to Gauge-Independent Renormalization of Yang-Mills Theories</i> By W. Kummer	261
<i>Quantum Kinks and Vector Bundles</i> By P.A. Marchetti	264
<i>The Confinement Problem in QCD and SUSY</i> By H. Markum (With 1 Figure)	270
<i>Fractional Quantum Hall Effect and Electron Lattice Formation</i> By G. Meissner (With 4 Figures)	275
<i>Gibbs Measure in Landau Gauge for Abelian Lattice Gauge Theories</i> By F. Nill	282
<i>On the Discrete Reconciliation of Relativity and Quantum Mechanics</i> By H.P. Noyes	287
<i>Hamilton-Dirac Formulation of Supersymmetric Yang-Mills Theories</i> By A. Rebhan, R. Di Stefano, and M. Kreuzer	291
<i>Scaling Behaviour of the Effective Chiral Action and Stability of the Chiral Soliton</i> By H. Reinhardt (With 1 Figure)	296

<i>On the Stochastic Representation of Supersymmetric Quantum Mechanics</i>	
By D. Roekaerts	300
<i>Quantum Chaos and Geometry</i>	
By F. Steiner	305
<i>On Supersymmetric Constraint Equations</i>	
By J. Tafel	313
<i>Scattering from Magnetic Fields</i>	
By M. Loss and B. Thaller (With 1 Figure)	317
Index of Contributors	323
