PREFACE	v
INTRODUCTORY ARTICLE by N. N. Bogolyubov	
Equations with Variational Derivatives in Problems of Statistical Physics and of Quantum Field Theory ..	1
I. THE METHOD OF FUNCTIONALS IN THE QUANTUM THEORY OF FIELDS.....	
	13
§1. The quantum theory of fields and functionals.....	13
§2. The method of Fock functionals.....	19
1. The essence of the method.....	19
2. The generating functional for probability amplitudes	24
3. The method of functionals and Fermi statistics....	27
4. The equations for the functional of state.....	30
§3. The generating functional for amplitudes of the new Tamm-Dankov method.....	40
II. THE GENERATING FUNCTIONAL FOR RELATIVISTIC FUNC- TIONS AND FUNCTIONAL INTEGRATION.....	
	43
§4. The generating functionals for relativistic functions ..	45
1. T-functions and the generating functional.....	45
2. Feynman amplitudes and the generating func- tional	52
3. The ρ -functions.....	56

§5. The space-time treatment of the quantum theory and functionals.....	57
1. The fundamental equations for the four-vector of state	57
2. The generalized Fock functional.....	61
3. The functional Fourier transformation.....	65
§6. The variation of the operator and functional integra- tion in the case of a Fermi field	68
BIBLIOGRAPHY	77
