Preface ix

MATHEMATICAL PHYSICS

Our Heritage—Our Future

Hans Mark 3

Development of Singularities in Nonlinear Viscoelasticity

J. A. Nohel 4

Integral Equation Characterization of the Complete Model Spectrum of Open Boundary Waveguides

J. S. Bagby 11

Analytic Approximation Methods of Computing Multi-Dimensional Principal Value Integrals

J. L. Fry and P. C. Pattnaik 27

Electron Transport in Layered Media by Invariant Imbedding

P. Nelson, A. K. Ray and J. C. Garth 37

Self-consistent Fields of Disordered Materials

S. Nomura 54

Direct, Formal Integration (DFI): A Global Alternative to FDM/FEM

F. R. Payne 62

On the Application of Fast Fourier Transforms and Power Spectrum Analysis to Incorrectly Posed Fredholm Integral Equations

J. P. Schaffer, E. J. Shaughnessy, and P. L. Jones 74

MATHEMATICAL ANALYSIS

Algebraic Design of Linear Multivariable Feedback Systems

C. A. Desoer and A. N. Gündes 85

Comparison of Solution Methods for Integral Equations with Cauchy Singularities

B. Bertram and A. G. Gibson 99

Solving Integro-Differential Equations by the Quadrature Method

F. Civan and C. M. Slipevich 106

Impulse Dynamics of Viscoelastic Fluids and Some Solutions by Integral Transforms

A. Narain 114

Numerical Solution of Random Singular Integral Equation Appearing
in Crack Problems

M. Sambandham, T. S. Srivatsan, and A. T. Bharucha-Reid **130**

On Estimation of the Prior Density in the Exponential Case by Numerical
Inversion of the Laplace Transform

A. K. Singh and A. Singh **149**

The Erdelyi Inversion Integrals: A Preliminary Evaluation

William Squire **156**

FLUID MECHANICS

A Posteriori Error Estimates and Adaptivity in Finite Element Method

J. T. Oden and L. Demkowicz **167**

DFI Solution of Compressible Laminar Boundary-Layer Flows

Chang-Soo Ahn and F. R. Payne **181**

Generalized Null-Field Equations for the Helmholtz Equation

K. Brod and G. Koopmann **194**

Application of a Large-Eddy Interaction Model to Channel Flow

S. K. Hong and M. W. Rubesin **204**

An Integral Method to Investigate Two-Dimensional Incompressible Turbulent
Boundary Layer

Iraj M. Kalkhoran and Donald R. Wilson **221**

Semi-Discrete Galerkin FEM Solutions for Boundary Layer Flows

M. S. Kim and F. R. Payne **227**

An Approximate Solution of Entrance Flow Problem

R. Lakshminarayanan and A. Haji-Sheikh **236**

Numeric Implementation of Matched Asymptotic Expansion for Prandtl Flow

R. Mokkapatil and F. R. Payne **249**

Computation of Optimum-Optimorum Wing-Fuselage Configuration for Future
Generation of Supersonic Aircraft

A. Nastase **259**

Three Computer Codes for Studying Darrieus Wind Turbine Aerodynamics

Ion Paraschivoiu **280**

A Numerical Solution of the Rotating Disk Flow Stability

Iskender Sahin **297**

- Mini-Symposium: CFD—Status and Prospects
A. Nastase, H. J. Migliore, and F. R. Payne 307

SOLID MECHANICS

- Shape Effect on Morley's Element
H. Abdalla and K. Hassan 313
- Estimation of Impact Forces Using the General Inverse Technique
H. R. Busby and D. M. Trujillo 320
- Complex Elements and the Associated Frontal Solution
Mingqi Cheng, M. A. Sutton, Y. J. Chao, and J. H. Bradburn 332
- Bending of Elastic Plates
C. Constanda 340
- Beams on Hyperelastic Foundations
Y. C. Das and S. M. Sargand 349
- Application of Boundary Element Method to Tornado-Structure Interaction Problem
J. R. McDonald and R. P. Selvam 359
- C⁰ Collocation Solution for Weak-Formulation Navier-Stokes Equations
H. J. Migliore, E. T. Ray, and E. G. McReynolds 368
- A Self-adaptive Mesh Refinement Technique for Boundary Element Solution of the Navier's Equation
J. J. Rencis and R. L. Mullen 383
- Boundary Integral Equation Stress Analysis of Cracked Autofrettaged Tubes
M. L. Shim and C. L. Tan 399
- Boundary Integral Equation Stress Analyses of Rotating Discs Containing Single and Coalescing Corner Flaws
C. L. Tan 416

THERMAL SCIENCES

- A Conservative Finite Element Method for Convective-Diffusion Problems
J. Banaszek and B. Staniszewski 435
- Methods for the Solution of Radiative Transfer Equation
M. F. Chen and A. K. Fung 455
- On Solution of Parabolic Partial Differential Equations Using Galerkin Functions
A. Haji-Sheikh 467

- On Eigenvalues of Graetz Problem with Axial Conduction by Finite Integral Transform
K. O. Kong, C. W. Tan, and C. Laohakul **480**
- Multinode Unsteady Surface Element Method and Its Applications
B. Litkouhi and J. V. Beck **487**
- Subcooled and Saturated Nucleate Boiling Free Convective Boundary Layers: A Two-Layer Approach
V. K. Magapu, J. E. S. Venart, and A. C. M. Sousa **508**
- An Improvement in Approximate Integral Methods for Convective Heat Transfer
D. R. Pitts and E. I. Griggs **530**
- Multidimensional Solutions to the Integral Form of the Radiative Transfer Equation
William H. Sutton **541**
- Heat Conduction in a Slab with a General Boundary Condition: An Integral Equation Approach
R. Villasenor and William Squire **551**
- Monte Carlo Calculation of Radiative View Factors
D. W. Yarbrough and Chon-lin Lee **563**
- OPTIMIZATION AND POPULATION DYNAMICS**
- Primal-Dual Properties of Sequential Gradient-Restoration Algorithms for Optimal Control Problems, Part 1: Basic Problem
A. Miele and T. Wang **577**
- Modeling of Fluid Control Components
D. A. Hullender and R. L. Woods **608**
- An Abstract Theorem in Linear and Nonlinear Deterministic Character-Dependent Models with Time Delay in Population Dynamics
Carlos Castillo-Chávez **620**
- Dynamics of a System of Three Ordinary Differential Equations with Biological and Chemical Applications
Daniel S. Levine **632**
- Mini-Symposium in Population Dynamics
Carlos Castillo-Chávez and Daniel S. Levine **644**
- Participants **645**
- Reviewers **647**
- Index **649**
