

TABLE OF CONTENTS

PREFACE	v
CHAPTER I. COUNTING AND ENUMERATION ON A SET	
A. Introduction	1
1. Set Generating Functions	1
2. Numerical Generating Functions	3
Examples	4
Fibonacci Numbers	4
B. Counting with Restrictions -- Techniques	7
1. Inclusion - Exclusion Principle	7
The Euler Function	8
Rencontres, Derangement or Montmort Problem	9
The Menage Problem	10
2. Permutations with Restricted Position. The Master Theorem	12
Exercises	13
Example	18
Rencontre Problem	19
Menage Problem	21
3. Extension of the Master Theorem	27
C. Partitions, Compositions and Decompositions	31
1. Permutation Counting as a Partition Problem	31
a) Counting with allowed transitions	31
b) Counting with prohibited transitions	32
2. Classification of Partitions	34
a) Distribution of unlabeled objects: Compositions	34
b) Distribution of unlabeled objects: Partitions	36
3. Ramsey's Theorem	42
Example	47

4. Distribution of Labeled Objects	48
a) Distinguishable boxes	48
b) Collections of pairs -- graph theory	49
c) Indistinguishable boxes (and labeled objects)	57
d) Partially labeled graphs - The Polya Theorem	58
Examples	61
Proof of Polya's Theorem	62
Examples	64
Exercises	67
e) Counting unrooted (free) unlabeled graphs	68
Dissimilarity Theorem	69
Example	70

CHAPTER II. COUNTING AND ENUMERATION ON A REGULAR LATTICE

A. Random Walk on Lattices	71
1. Regular Cubic Lattices	72
Examples	73
2. General Lattices	78
i) Nearest neighbor random walk on a face centered cubic lattice	79
ii) Nearest neighbor random walk on a body centered cubic lattice	80
B. One Dimensional Lattices	81
1. The Ballot Problem	81
Example	83
2. One Dimensional Lattice Gas	85
C. Two Dimensional Lattices	89
1. Counting Figures on a Lattice, General Algebraic Approach	89
2. The Dimer Problem -- Transfer Matrix Method	91
Exercises	101

3.	The Dimer Problem -- Pfaffian Method	101
	Exercises	111
4.	The Dimer Problem -- First Permanent Method	111
5.	The Dimer Problem -- Second Permanent Method	116
D.	Counting Patterns on Two Dimensional Lattices	123
1.	The Ice Problem -- Introduction	123
2.	Square Ice -- The Transfer Matrix Method	129
3.	Square Ice -- Exact Solution	134
4.	Other Hydrogen Bonded Models -- Dimer Solution	148
E.	The Ising Model	156
1.	Introduction	156
2.	Estimates of the Curie Temperature	158
3.	Combinatorial Solution of the Ising Model	169
4.	Other Combinatorial Solutions	177
5.	Spin Correlations	181
	INDEX	191
