

CONTENTS

FOREWORD	vii
CHAPTER 1. FUNCTIONAL INTEGRALS AND QUANTUM MECHANICS	1
1. Introduction	1
2. Functional Integrals in Quantum Mechanics	4
3. Quantization of Systems with Constraints	8
4. Functional Integrals and Quantization on Manifolds	13
CHAPTER 2. FUNCTIONAL INTEGRALS IN QUANTUM FIELD THEORY AND STATISTICAL PHYSICS	17
5. Functional Integrals and Perturbation Theory in Quantum Field Theory	17
6. Functional Integrals and the Temperature Diagram Technique in Statistical Physics	29
CHAPTER 3. GAUGE FIELDS	41
7. Quantization of Gauge Fields	41
8. Quantum Electrodynamics	46
9. Yang–Mills Fields	53
10. Quantization of a Gravitational Field	67
11. Attempts to Construct a Gauge-Invariant Theory of Electromagnetic and Weak Interactions	86
CHAPTER 4. INFRARED ASYMPTOTICS OF GREEN'S FUNCTIONS	95
12. Method of Successive Integration Over 'Rapid' and 'Slow' Fields	95
13. Infrared Asymptotic Behaviour of Green's Functions in Quantum Electrodynamics	98

CHAPTER 5. SCATTERING OF HIGH-ENERGY PARTICLES	111
14. Double Logarithmic Asymptotics in Quantum Electrodynamics	111
15. Eikonal Approximation	116
CHAPTER 6. SUPERFLUIDITY	123
16. Perturbation Theory for Superfluid Bose Systems	123
17. Bose Gas of Small Density	129
18. Application of Functional Integrals to the Derivation of Low-Energy Asymptotic Behaviour of the Green's Function	140
19. Hydrodynamical Lagrangian of Nonideal Bose Gas	148
20. Superfluidity of Two-Dimensional and One-Dimensional Bose Systems	160
21. Quantum Vortices in a Bose Gas	173
CHAPTER 7. SUPERCONDUCTIVITY	183
22. Perturbation Theory of Superconducting Fermi Systems	183
23. Superconductivity of the Second Kind	191
24. Bose Spectrum of Superfluid Fermi Gas	205
25. A System of the He ³ Type	211
CHAPTER 8. PLASMA THEORY	229
26. Hydrodynamical Action in Plasma Theory	229
27. Damping of Plasma Oscillations	237
CHAPTER 9. THE ISING MODEL	240
28. The Statistical Sum of the Ising Model as a Functional Integral	240
29. The Correlation Function of the Ising Model	252
CHAPTER 10. PHASE TRANSITIONS	262
30. Special Role of Dimension $d = 4$	262
31. Calculation of Critical Indices and the Wilson Expansion	273
CHAPTER 11. VORTEX-LIKE EXCITATIONS IN RELATIVISTIC FIELD THEORY	281
32. Vortices in the Relativistic Goldstone Model	281
33. On Vortex-Like Solutions in Quantum Field Theory	288
REFERENCES	290
SUBJECT INDEX	298
