

CONTENTS

Some remarks on the stability of hydromagnetic shock waves	1
By C. K. CHU	
A model of some plasma shock structures	17
By P. GERMAIN	
Stability of a slightly resistive plasma	46
By JOHN M. GREENE	
On the controversy over an aligned magnetic field	57
By G. S. S. LUDFORD	
Hydromagnetic instability of the sub-Alfvén equations	64
By WILLEM V. R. MALKUS	
Singular eigenfunctions and plasma problems	78
By K. M. CASE	
A mathematical problem in the "quasi-linear" theory of plasma waves . .	100
By MICHEL TROCHERIS	
Longitudinal plasma oscillations	127
By HAROLD WEITZNER	
Exchange invariance in fluid systems	152
By WILLIAM A. NEWCOMB	
The guiding center plasma	162
By HAROLD GRAD	
Problems in plasma microinstability	249
By M. N. ROSENBLUTH	
The present state of plasma kinetic theory	257
By EDWARD A. FRIEMAN	
Quasi-particles in a plasma	270
By NORMAN ROSTOKER	
On Ohm's law resulting from instability	281
By R. Z. SAGDEEV
