

Contents

Foreword	
<i>Wojciech H. Zurek</i>	vii
I Physics of Information	1
Information, Physics, Quantum: The Search for Links	
<i>John Archibald Wheeler</i>	3
Information from Quantum Measurements	
<i>Benjamin Schumacher</i>	29
Local Accessibility of Quantum States	
<i>William K. Wootters</i>	39
The Entropy of Black Holes	
<i>V. F. Mukhanov</i>	47
Some Simple Consequences of the Loss of Information in a Spacetime with a Horizon	
<i>Shin Takagi</i>	53
Why is the Physical World so Comprehensible?	
<i>P. C. W. Davies</i>	61
II Laws of Physics and Laws of Computation	71
Algorithmic Information Content, Church-Turing Thesis, Physical Entropy, and Maxwell's Demon	
<i>W. H. Zurek</i>	73
Complexity, Entropy, and the Physics of Information, SFI Studies in the Sciences of Complexity, vol. VIII, Ed. W. H. Zurek, Addison-Wesley, 1990	xi

Entropy and Information: How Much Information is Needed to Assign a Probability? <i>Carlton M. Caves</i>	91
Complexity of Models <i>J. Rissanen</i>	117
Laws and Boundary Conditions <i>C. H. Woo</i>	127
How to Define Complexity in Physics, and Why <i>Charles H. Bennett</i>	137
III Complexity and Evolution	149
Requirements for Evolvability in Complex Systems: Orderly Dynamics and Frozen Components <i>Stuart A. Kauffman</i>	151
Valuable Information <i>Seth Lloyd</i>	193
Non-Equilibrium Polymers, Entropy, and Algorithmic Information <i>Dilip K. Kondepudi</i>	199
The Dynamics of Complex Computational Systems <i>Tad Hogg</i>	207
Computation at the Onset of Chaos <i>James P. Crutchfield and Karl Young</i>	223
IV Physics of Computation	271
Parallel Quantum Computation <i>Norman Margolus</i>	273
Information Processing at the Molecular Level: Possible Realizations and Physical Constraints <i>W. G. Teich and G. Mahler</i>	289
How Cheap Can Mechanics' First Principles Be? <i>Tommaso Toffoli</i>	301
Intermittent Fluctuations and Complexity <i>Xiao-Jing Wang</i>	319

Information Processing in Visual Perception <i>A. Zee</i>	331
V Probability, Entropy, and Quantum	343
Thermodynamic Constraints on Quantum Axioms <i>Asher Peres</i>	345
Entropy and Quantum Mechanics <i>M. Hossein Partovi</i>	357
Einstein Completion of Quantum Mechanics Made Falsifiable <i>O. E. Rössler</i>	367
Quantum Mechanics and Algorithmic Complexity <i>J. W. Barrett</i>	375
Probability in Quantum Theory <i>E. T. Jaynes</i>	381
Quantum Measurements and Entropy <i>H. D. Zeh</i>	405
VI Quantum Theory and Measurement	423
Quantum Mechanics in the Light of Quantum Cosmology <i>Murray Gell-Mann and James B. Hartle</i>	425
Information Dissipation in Quantum Cosmology and the Emergence of Classical Spacetime <i>Jonathan J. Halliwell</i>	459
The Quantum Mechanics of Self-Measurement <i>David Z. Albert</i>	471
The Quantum-Classical Correspondence in Light of Classical Bell's and Quantum Tsirelson's Inequalities <i>L. A. Khalfin</i>	477
Some Progress in Measurement Theory: The Logical Interpretation of Quantum Mechanics <i>Roland Omnes</i>	495
Indices	513
