

## CONTENTS

Preface	v
On the Complete Integrability of Certain Nonlinear Evolution Equations in One and Two Spatial Dimensions <i>M. J. Ablowitz and J. Villarroel</i>	1
Chaos in One Dimension <i>W. A. Coppel</i>	14
On an Overdetermined Euclidean/Poincaré-Invariant System of Partial Differential Equations <i>C. M. Cosgrove</i>	22
Kinematics of Reconnection in Three Dimensions <i>J. M. Greene</i>	49
Order and Chaos in Polarized Nonlinear Optics <i>D. D. Holm</i>	56
Accurate Simulations of Low-Frequency Plasma Instabilities <i>P. M. Lyster, H. V. Wong and H. L. Berk</i>	71
Generating Fractals <i>J. E. Hutchinson</i>	76
Soliton Theory, Painlevé Property, and Integrability <i>M. D. Kruskal and N. Joshi</i>	82
Minimizing Flux <i>J. D. Meiss and R. L. Dewar</i>	97
Transition from Weak to Strong Turbulence <i>A. M. Rubenchik</i>	104
The Kadomtsev-Petviashvili Equation and Water Waves <i>H. Segur, J. L. Hammack and N. W. Scheffner</i>	109
