I	General Review Lectures	
	Advances in Supergravity	2
	<i>Y Ne'eman</i>	
	Group Manifold Approach in Unified Gravity Theories	25
	<i>T Regge</i>	
	Einstein and the Geometrization of Physics	33
	<i>A Trautman</i>	
	Classical Scattering Theory	41
	<i>W Thirring</i>	
II	Differential Operators on Manifolds and Quantization Methods	
	<i>Lectures</i>	
	Coadjoint Orbits and a New Symbol Calculus for Line Bundles	66
	<i>B Konstant</i>	
	Kähler Structures for Solution Varieties of Pseudodifferential Operators	69
	<i>S I Andersson</i>	
	Group Action on Homogeneous Spaces and Solutions of Nonlinear Dynamical Systems	79
	<i>A O Barut</i>	
	Symplectic Analogies	87
	<i>V Guillemin and S Sternberg</i>	
	<i>Seminars</i>	
	Invariant Quantization of Linear Time-dependent Wave Equations	103
	<i>S M Paneitz</i>	
	SU(n) Bundles over the Configuration Space of Three Identical Particles Moving in \mathbb{R}^3	105
	<i>F J Bloore</i>	
	Dynamical Quantization	109
	<i>T D Palev</i>	
III	Particle Physics and Space-Time Geometry	
	<i>Lectures</i>	
	C_{2n} Spinor Geometry	112
	<i>P Budinich and P Furlan</i>	
	Elementary Particles in Universal Space-Time	127
	<i>I E Segal</i>	
	Second Order Tangent Structure for Spacetimes	141
	<i>C T J Dodson and M S Radivoiovic</i>	
	<i>Seminars</i>	
	First Cohomology Groups for Lie Groups	149
	<i>S R Komy</i>	

IV Quantum Field Theories and Gauge Theories

Lectures

- Algebraic Gauge Quantum Field Theory on Generalized Kaluza-Klein Spaces 154
H D Doebner and F B Pasemann
- Ultraviolet Cancellations in Supersymmetric Gauge Quantum Field Theories 163
S Ferrara
- Quantum Field Theory and Spatial Topology 171
C J Isham
- Gauge Field Theories and the Equivalence Principle 187
C A Orzalesi
- On the Symmetry Properties of Separated Monopole Configurations 201
L O Raifeartaigh and S Rouhani

Seminars

- Holonomy Groups in Gravity and Gauge Fields 211
J Anandan
- How Spatial Topology Affects the Yang-Mills Vacuum 217
G Kunstatter
- Nonlinear Differential Sequences in Gauge Theory 221
J F Pommaret
- Yang-Mills Gauge and the Gravitational Gauge 225
D K Sen
- Twisted Field Theories 229
S D Unwin
- A Differential Classification and a Quasi-metric Associated with SU(2) Yang-Mills Field Strengths 231
H K Urbantke
- Topological Charges in Supersymmetric Yang-Mills Theories 235
P A Zizzi

V Gravity

Lectures

- Energy Definition and Stability for $\Lambda \neq 0$ Gravity 240
S Deser
- Quantum Gravity at Short Distances 253
G Furlan
- Quantum Theory of Wormholes 263
P Hajicek
- Phase Transitions in the Early Universe as a Consequence of a Generalized Theory of Gravitation 279
J W Moffat

Seminars

- On Group Covariance and Spin Motion in Gravitational Theory 289
L Halpern
- Quantum Gravity on a Regge Simplicial Net and Asymptotic Safety 293
M Martellini
