

TABLE OF CONTENTS

PREFACE

v

Part I. General properties of fractals

Self-affine fractal sets, I: The basic fractal dimensions	
B.B. MANDELBROT	3
Self-affine fractal sets, II: Length and surface dimensions	
B.B. MANDELBROT	17
Self-affine fractal sets, III: Hausdorff dimension anomalies and their implications	
B.B. MANDELBROT	21
Random fractals, flow fractals and the renormalisation group	
J. MELROSE	29
On finitely ramified fractals and their extensions	
R. HILFER and A. BLUMEN	33

Part II. Analysis of fractal properties of materials

Structure of random silicates: Polymers, colloids and porous solids	
D.W. SCHAEFER and K.D. KEEFER	39
Interaction of fractals with fractals: Adsorption of polystyrene on porous Al₂O₃	
P. PFEIFER	47
Scattering by fractals	
E. JAKEMAN	55
Optical Fourier transforms of fractals	
C. ALLAIN and M. CLOITRE	61
On the measure of fractal dimensionalities through physical properties	
C. TSALLIS	65

Part III. Polymer statistics and self-avoiding-walks

Random walks with memory	
L. PELITI	73
Survival probability and enhancement factor in polymer statistics	
L. PIETRONERO and L. PELITI	83

The Laplacian random walk J.W. LYKLEMA and C. EVERTSZ	87
Kinetically growing self-avoiding walks J.W. LYKLEMA	93
The coil-globule transition in 2-dimensions N. JAN, A. CONIGLIO, I. MAJID and H.E. STANLEY	97
Self-similarity of mutual and self-intersections of random fractals A.L. STELLA, R. DEKEYSER and A. MARITAN	101
Statistical mechanics of self-avoiding random surfaces A. MARITAN and A.L. STELLA	107
Bethe - like approximation for self-avoiding random walks and surfaces (and frustrations) A. CAPPELLI, R. LIVI, A. MARITAN and S. RUFFO	111
On the self-avoiding walks on disordered lattices S. MILOŠEVIĆ and A. CHERNOUTSAN	115
Proteins in the experiment Y.S. YANG	119
Part IV. Branched polymers, gelation and percolation	
Fractal dimension and the synthesis of branched polymers Z. ALEXANDROWICZ	125
Fractal dimensionalities of backbones and clusters in a kinetic gelation model A. CHHABRA, H.J. HERRMANN and D.P. LANDAU	129
A lattice magnetic model for branched polymers and the sol-gel transition A.E. GONZALEZ	133
Percolation in a concentration gradient J.F. GOUYET, M. ROSSO and B. SAPOVAL	137
Surface tension in Potts models and percolation C.K. HARRIS	141
Percolation on the DAP R. DEWAR and C.K. HARRIS	145
Part V (A). Irreversible growth models: Laplacian fractals, dielectric breakdown, fracture propagation and viscous fingers in liquids	
Properties of Laplacian fractals for dielectric breakdown in 2 and 3 dimensions H.J. WIESMANN and L. PIETRONERO	151

Scaling properties of growing zone and capacity of Laplacian fractals L. PIETRONERO, C. EVERTSZ and H.J. WIESMANN	159
An infinite hierarchy of exponents to describe growth phenomena A. CONIGLIO	165
2-D dielectric breakdown between parallel lines M. MURAT	169
Dielectric breakdown in three dimensions S. SATPATHY	173
The fractal nature of fracture E. LOUIS, F. GUINEA and F. FLORES	177
Pattern formation of dendritic fractals in fracture and electric breakdown H. TAKAYASU	181
Collapse of loaded fractal trees S.A. SOLLA	185
Fractals and the fracture of cracked metals C.W. LUNG	189
When are viscous fingers fractal? J. NITTMANN, G. DACCORD and H.E. STANLEY	193
Part V (B). Irreversible growth models: Diffusion-limited aggregation, dendritic growth, Eden model and cluster-cluster aggregation	
Some recent advances in the simulation of diffusion limited aggregation and related processes P. MEAKIN	205
Internal anisotropy of diffusion-limited aggregates P. MEAKIN and T. VICSEK	213
Growing interface in diffusion-limited aggregation and in the Eden process M. PLISCHKE and Z. RACZ	217
Sticking probability scaling in diffusion-limited aggregation L.A. TURKEVICH and H. SCHER	223
Cone angle picture and anisotropy in DLA cluster growth G. ROSSI, B.R. THOMPSON, R.C. BALL and R.M. BRADY	231
Growth of anisotropic DLA clusters B.R. THOMPSON, G. ROSSI, R.C. BALL and R.M. BRADY	237
Continuum DLA: Random fractal growth generated by a deterministic model L.M. SANDER	241

Formation of solidification patterns in aggregation models T. VICSEK	247
Scaling properties of the surface of the Eden model R. JULLIEN and R. BOTET	251
Cluster aggregation R. BOTET, R. JULLIEN and M. KOLB	255
Anisotropy in cluster and particle aggregation M. KOLB	259
Reversibility in cluster aggregation M. KOLB	263
Film on aggregation processes M. KOLB	267
Field theory approach to the Eden model and diffusion-limited aggregation L. PELITI and Y.-C. ZHANG	269
Spreading of epidemic processes leading to fractal structures P. GRASSBERGER	273
Random rain simulations of dendritic growth B. CAPRILE, A.C. LEVI and L. LIGGIERI	279
Experimental study of two dimensional aggregation C. ALLAIN and M. CLOITRE	283
Part VI. Kinetics of clustering	
Kinetics of clustering in irreversible aggregation M.H. ERNST	289
Tail distribution for large clusters in irreversible aggregation P.G.J. VAN DONGEN and M.H. ERNST	303
Scaling generalization of the Smoluchowski equation Z. RÁCZ	309
Clustering in the Universe F. LUCCHIN	313
Stochastic approach to large scale clustering of matter in the Universe L. PIETRONERO and R. KUPERS	319
Part VII. Dynamical properties of fractal structures	
Fractal surfaces and the de Gennes termite model for a two-component random material H.E. STANLEY	327

Dynamical properties of random and non-random fractals R. STINCHCOMBE	337
The elastic behavior of fractal structures I. WEBMAN	343
Static and dynamic properties of loopless aggregates S. HAVLIN	351
The fractal dimension of growth perimeters A.E. MARGOLINA	357
Percolation and fractal behavior in disordered lattices P. ARGYRAKIS	361
Hierarchical fractal graphs and walks thereupon J. MELROSE	365
Fractal-like exciton dynamics: Geometrical and energetical disorder R. KOPELMAN	369
Nyquist, diffusion and flicker (1/f) noise in fractals and percolating networks R. RAMMAL	373
A real-space renormalization group approach to electrical and noise properties of percolation clusters J.M. LUCK	379
Theory of the ac response of rough interfaces S.H. LIU, T. KAPLAN and L.J. GRAY	383
Part VIII. Hierarchical and fractal features of disordered systems	
The nature of temporal hierarchies underlying relaxation in disordered systems M.F. SHLESINGER and J. KLAFTER	393
Reactions in disordered media modelled by fractals A. BLUMEN, J. KLAFTER and G. ZUMOFEN	399
Self-similar temporal behavior of random walks in one-dimensional random media J. BERNASCONI and W.R. SCHNEIDER	409
An observation of scaling in trapping reactions Z.B. DJORDJEVIĆ	413
Hierarchically constrained thermodynamics in metastable systems and glasses L. PIETRONERO	417
Fractal clusters and scaling in the Ising model J.L. CAMBIER and M. NAUENBERG	421

Devil's staircase and strange attractor in the Ising model with competing interactions M.J. DE OLIVEIRA, S.R. SALINAS and C.S.O. YOKOI	427
Problems about the self-similar structure of wavefunctions in disordered systems A.P. SIEBESMA and L. PIETRONERO	431
Part IX. Chaos, turbulence and related topics	
Circle maps in the complex plane P. CVITANOVIĆ, M.H. JENSEN, L.P. KADANOFF and I. PROCACCIA	439
Fractal models for two- and three-dimensional turbulence G. PALADIN and A. VULPIANI	447
Numerical investigation of nonuniform fractals R. BADII and A. POLITI	453
Generalised scale invariance and anisotropic inhomogeneous fractals in turbulence D. SCHERTZER and S. LOVEJOY	457
Analysis of the fractal shape of severe convective clouds F.S. RYS and A. WALDVOGEL	461
Nested cellular automata: Continuous aspects of discrete systems U. QUASTHOFF	465
The hyperbolic helix hypothesis: Stapleton's fractal measure on the hydrophobic free energy mode distributions of allosteric proteins A.J. MANDELL	469
AUTHOR INDEX	475
