

## Contents

Preface	v
Organizing Committee	vi

### Part I

Revolutions in Astronomy <i>F. Dyson</i>	3
---	---

### Part II

Trace Formulae for Levy-Gaussian Measures and Their Application <i>L. Accardi and O. G. Smolyanov</i>	31
Quasi-Natural Potential, Passivity and Learnability in Robot Dynamics with OR without Geometric Constraint OR System Fluctuations <i>S. Arimoto and T. Naniwa</i>	48
Mathematical Theory of Early Vision: Historical Note <i>J. J. Atick</i>	84
Quantitative Tests of a Theory of Retinal Processing: Contrast Sensitivity Curves <i>J. J. Atick and A. N. Redlich</i>	87
Color Coding and Its Interaction with Spatiotemporal Processing in the Retina <i>J. J. Atick, Z. Li and A. N. Redlich</i>	119
Unidirectional versus Bi-directional Theory for Trajectory Planning and Control <i>M. Kawato</i>	144
Analysis on the Amino Acid Sequence in Protein <i>Y. Kiho</i>	181

Generalized Functions and Functionals in Fluctuation Analysis <i>I. Kubo and Y. Yokoi</i>	203
Relaxations in the Electronic Excited States of Complex Systems <i>T. Kushida</i>	231
Time Variation of X-Rays from X-Ray Stars <i>S. Miyamoto</i>	254
Fluctuation can be Useful: Analysis of Spike Train by Use of a Fluctuation Input <i>K.-I. Naka, H. Machuca and H. M. Sakai</i>	299
Hida Distributions and More <i>L. Streit</i>	311
Coherent Approach to Fluctuations <i>M. Suzuki</i>	319
Simulational and Analytic Studies of Anomalous Relaxation in Disordered Systems <i>F. Yonezawa, S. Fujiwara and S. Gomi</i>	340

### Part III

Work with Pavel Bleher on Eigenvalue Statistics in Integrable Dynamical Systems <i>F. Dyson</i>	365
Errata to Vol. I	383
