

C O N T E N T S

SECTION 1 THE INVERSE SPECTRAL TRANSFORM

1.1 GENERAL ASPECTS		1
The reduction of integrable evolution equations with examples	A. DEGASPERIS	3
The dynamical behavior of interacting solitons	B. FUCHSSTEINER	13
Spectral transform and Bäcklund transformations for evolutions with singular dispersion relations	J.J.P. LEON	33
Gauge transformations and generating operators for the quadratic bundle	V.S. GERDJIKOV M.I. IVANOV Y.S. VAKLEV	45
Bäcklund charts for the Caudrey-Dodd-Gibbon and Kaup-Kupershmidt hierarchies	C. ROGERS S. CARILLO	57
Hierarchies of nonlinear integrable evolution equations with variable coefficients	D. LEVI	75
Extending Green's function formalism to general nonlinear equations	D.G. CACUCI R.B. PEREZ V. PROTOPOESCU	87
Integrable quasi-linear systems: generalized hodograph transformation	J. GIBBONS Y. KODAMA	97
Reciprocal transformations and their applications	C. ROGERS	109
 1.2 NEW INTEGRABLE SYSTEMS		 125
New results on the Kowalewski top: a Lax pair, generalizations and algebraic-geometric solutions	A.G. REYMAN	127

Coupled KdV equations associated with a novel Schrödinger spectral problem	M. ANTONOWICZ A.P. FORDY	145
Cavitons as an integrable pondermotive system	D.J. KAUP	161
A new integrable system including the oscillating two-stream instability equation	D.J. KAUP S. KAWAMOTO	181
Some integrable equations associated with symmetric spaces	C. ATHORNE	191
A 2×2 Zakharov-Shabat system with a quadratic spectral parameter	JYH-HAO LEE	199
1.3 TWO SPACIAL DIMENSIONS		209
The bi-hamiltonian formulations of integrable evolution equations in multidimensions	P.M. SANTINI A.S. FOKAS	211
On the relation between the bicomplex and the bilocal formalism for KP systems	F. MAGRI C. MOROSI G. TONDO	231
Symmetric functions and the KP hierarchy	J.J.C. NIMMO	245
Spectral transforms and non canonical recursion operators in multidimensions	M. BOITI J.J.P. LEON F. PEMPINELLI	263
Algebraic structure of integrable systems in $D = 2+1$ and routes towards multidimensional integrability	F. NIJHOFF J.M. MAILLET	281
Fredholm and other determinants and the τ function for the Kadomtsev-Petviashvili (KP) hierarchy	C. POPPE	317
Recursion and group structures of the integrable equations in $1+1$ and $1+2$ dimensions. Bilocal approach	B.G. KONOPELCHENKO	323
Soliton equations generalized to higher dimensions	A. CSIZMAZIA	339
Lattice equations, hierarchies and hamiltonian structures	G.L. WIERSMA H.W. CAPEL	349
The two-dimensional Toda-lattice and its recursion operators	O. RAGNISCO	365

1.4 ALGEBRAIC AND GEOMETRICAL STRUCTURES

377

On Bäcklund transformations for nonlinear integrable systems	M.V. SAVELIEV	379
Soliton equations and the representation theory of the semisimple Lie algebras	V.S. GERDJIKOV	383
Miura maps and bi-hamiltonian structures for integrable stationary flows	M. ANTONOWICZ A.P. FORDY	391
Bäcklund transformation and Lie-Bäcklund group	N. ASANO	403
A non-archimedean approach to prolongation theory	H.N. VAN ECK	415
Lie algebra and trace identity	G-Z. TU D-Z. MENG	425

SECTION 2 APPLICATIONS OF THE SOLITON THEORY**2.1 SOLITONS AND INTEGRABLE SYSTEMS IN PHYSICS**

435

Classical Poisson bracket relations and quantum commutation relations for Davey-Stewartson	C.L. SCHULTZ M.J. ABLOWITZ D. BAR YAACOV	437
Nonlinear evolution equation for the distribution of technologies according to efficiency levels	G.M. HENKIN V.M. POLTEROVICH	449
Amplification of coherent optical pulses and "non-bound-state" solitons	J.R. COX R.D. HOCHMAN	459
Higher order Korteweg-de Vries equation for interacting phonons in a one-dimensional anharmonic lattice	R. CHATTERJEE S.J. SMITH	469
Geodesic congruences and inhomogeneous Heisenberg ferromagnet	A. SYM W. WESSELIUS	483
The forced Toda lattice: an integrable system	D. WYCOFF D.J. KAUP	491
Solitary waves in straits	V. ARTALE D. LEVI	509
The KP equation and biperiodic water waves	N. SCHEFFNER J. HAMMACK H. SEGUR	517

2.2 NEARLY INTEGRABLE SYSTEMS, PERTURBATIVE AND NUMERICAL METHODS		529
Formation of instability regions from unstable states in nonlinear systems with dissipation	V.G. KAMENSKY S.V. MANAKOV	531
Correlations between chaos in the perturbed Sine-Gordon equation and finite modal equations	M.G. FOREST	537
Nearly integrable systems: normal form and solitons	Y. KODAMA	559
Application of Lie methods to autonomous hamiltonian perturbations of the Korteweg- de Vries equation: second order calculation	C.R. MENYUK	571
On the nonlinear Schrödinger equation as an averaging theory	E.R. TRACY J.W. LARSON A.R. OSBORNE L. BERGAMASCO	593
Structural stability of solutions to integrable nonlinear PDE's and explicit Poincaré maps	B. BIRNIR P. SMEREKA	603
Numerical approach of the quintic Schrödinger equation	A. CLOOT B.M. HERBST J.A.C. WEIDEMAN	637
Formation and competition of periodic patterns	H.R. SCHOBER W. ZIMMERMANN	647
Chaotic dynamics in Josephson junction simulations	P.H. BORCHERDS G.P. McCAULEY	657
3-D numerical hydrodynamics of self-gravitating gas	M. NAGASAWA S.M. MIYAMA	669
Evolution of a transient plasma	C. GAUTHEREAU Y. STEPHAN	679
2.3 OTHER TOPICS: INTEGRABILITY, INVERSE PROBLEMS, ORDINARY DIFFERENTIAL EQUATIONS		693
On the Eckhaus equation	F. CALOGERO S. DE LILLO	695
Contact symmetry groups and integrable systems	J. VILLARROEL	701

Existence and nonexistence of global solution, soliton solution for a class of the systems of generalized Zakharov equations	GUO BOLING	711
Nonintegrability of homogeneous Fokker-Planck and electromagnetic Hamiltonians	D. ROEKAERTS H. YOSHIDA	721
For an impedance scattering theory	P.C. SABATIER	727
Multi-dimensional $n \geq 3$ inverse scattering theory	B. DeFACIO O. BRANDER	751
Lyapunov exponents of experimental systems	R. CONTE M. DUBOIS	767
Equivalence classes of differential equations	F.M. MAHOMED P.G.L. LEACH	781
On certain functional equations connected with integrable many body dynamical systems	M. BRUSCHI	791
LIST OF PARTICIPANTS		794
