

Contents

Part I. Introductory Lecture

- * How to Reduce Practically Any Problem to One Dimension
By D.C. Mattis 3

Part II. Solitons

- * An Overview of Soliton Mathematics. By D.W. McLaughlin 13
- * Statistical Mechanics of Solitons. By A.R. Bishop 27
- * The Quantum Inverse Scattering Method and Applications to Spin Chains. By M. Fowler 47
- Bethe Ansatz, Connection Between One-Dimensional Models and Their Classification. By E. Berkcan and L.N. Cooper 59
- * Quantum Statistics of Solitons. By K. Maki 63
- * Classical Statistical Mechanics of Soliton-Bearing Systems
By T. Schneider and E. Stoll 75
- * Multistable Driven Systems. By M. Büttiker and R. Landauer 87
- Inherent Effects of Discretization in an Interacting Kink-Phonon System. By N. Theodorakopoulos and R. Klein 100
- * Ising Models, Solitons, and the Devil's Staircase. By P. Bak 104

Part III. Magnetic Chains

- * Quantum Spin Chains
By J.C. Bonner, H.W.J. Blöte, H. Beck, and G. Müller 115
- * Dynamic Correlations in Classical Heisenberg Chains
By S.W. Lovesey 129
- * Dynamics of One-Dimensional Magnets: Neutron Scattering Studies
By M. Steiner 140

* denotes invited papers

Solitons in One-Dimensional Magnets with Various Symmetries By H.J. Mikeska	153
A Comparison of Static and Dynamic Properties of One-Dimensional Magnets and Corresponding sG Systems By J.M. Loveluck, T. Schneider, E. Stoll, and H.R. Jauslin	157
Evidence for Soliton Excitations in the One-Dimensional Antiferromagnet TMMC By L.P. Regnault, J.P. Boucher, J. Rossat-Mignod, J.P. Renard, J. Bouillot, and W.G. Stirling	161
Quantum Effects in the Dynamics of the One-Dimensional Planar Antiferromagnet By G. Müller, H. Thomas, M.W. Puga, and H. Beck	165
Ground-State and Local Excitations in Co(PYR) ₂ C ₁₂ By W.J.M. de Jonge, C.H.W. Swüste, and K. Kopininga	169
New High-Field Phenomena in Spin-Peierls Systems By I.S. Jacobs, J.W. Bray, L.V. Interrante, D. Bloch, J. Voiron, and J.C. Bonner	173

Part IV. Polymers

* Solitons in Polyacetylene: A Summary of Experimental Results By A.J. Heeger and A.G. MacDiarmid	179
* Magnetic Resonance Studies of Soliton Diffusion in Polyacetylene By F. Devreux, K. Holczer, M. Nechtschein, T.C. Clarke, and R.L. Greene	194
* Theory of Polymers Having Broken Symmetry Ground States By W.P. Su, S. Kivelson, and J.R. Schrieffer	201
Attracting Solitons and a First Order Lock-In Transition: Metallic Polyacetylene and the Spin-Peierls System By B. Horovitz	212
Polyacetylene Revisited. By Y. Tomkiewicz, N.S. Shiren, T.D. Schultz, K. Mortensen, M.L.W. Thewalt, J.D. Kuptsis, R.G. Schad, B.H. Robinson, T.C. Clarke, G.B. Street, H. Thomann, L.R. Dalton, and H.B. Brom	214
Magnetic Behavior of Polyacetylene, Polyparaphenylene and Polypyrrole By M. Peo, S. Roth, J. Hocker, and K. Dransfeld	218
Static and Dynamic Susceptibilities of Magnetic Polymers By J.C. Scott, R.E. Stahlbush, P.D. Krasicky, and R.H. Silsbee ...	221

Part V. Quasi-One Dimensional Conductors

* Structural Ordering in Quasi-One-Dimensional Systems. By J.D. Axe ...	227
* One-Dimensional Metals: Theory versus Experiment. By T.M. Rice	229

* Electronic Instabilities in Quasi-One-Dimensional Conductors: Insulator or Superconductor? By D. Jérôme and H.J. Schulz	239
* Non-Linear Transport in the Fröhlich Mode Conductor, NbSe ₃ By R.M. Fleming	253

Part VI. Disorder and Localization

* Lattice Dynamics and Spectral Properties of Disordered Chains By M. Goda	265
* Excitation Dynamics in Random One-Dimensional Systems By S. Alexander, J. Bernasconi, W.R. Schneider, and R. Orbach	277
* Random Exchange Spin Chains. By W.G. Clark	289
Universality in Quantum Random Magnetic Chains By J.E. Hirsch and J.V. Jose	302
* Localization in One Dimension. By D.J. Thouless	306
* Localization in Thin Wires. By N. Giordano	310
Transport Quantities in One-Dimensional Disordered Systems By B.S. Andereck and E. Abrahams	317

Part VII. Superionic Conductors, Coulomb Systems, Molecular Systems
and Fractals

* One-Dimensional Superionic Conductors. By H.U. Beyeler	323
* One-Dimensional Coulomb Systems. By Ph. Choquard, H. Kunz, Ph.A. Martin, and M. Navet	335
* Exciton Dynamics in Quasi-One-Dimensional Molecular Systems By A.H. Zewail and D.D. Smith	351
Critical Phenomena and Fractals with Dimensionality Near 1 By Y. Gefen, A. Aharony, and B.B. Mandelbrot	363
<i>Index of Contributors</i>	367
