

CONTENTS

Foreword

v

The Master Equation and Some Applications in Physics	1
<i>C. Van Den Broeck</i>	
Methods for Solving the Fokker-Planck Equation	29
<i>H. Risken</i>	
The Functional Derivative and its Use in the Description of Noisy Dynamical Systems	69
<i>P. Hanggi</i>	
Introduction to External Non-white Noise Problems	96
<i>J. M. Sancho</i>	
Noise Induced Transitions in Nonequilibrium Systems	110
<i>R. Lefever</i>	
Stochastic Methods and Models in the Dynamics of Phase Transitions	132
<i>M. San Miguel</i>	
Decay of an Unstable State	161
<i>P. Tartaglia</i>	
Classical Equilibrium between Radiation and Matter. New look at an Old Problem	184
<i>E. Santos</i>	
Stochastic Approaches to Quantum Mechanics	203
<i>L. de la Peña and A. M. Cetto</i>	
Dissipative Quantum Decay at Finite Temperatures	244
<i>P. Hanggi, H. Grabert and U. Weiss</i>	

SHORT COMMUNICATIONS

Stationary Distribution Function of a Nonlinear Laser Model with Multiplicative Colored Noise	251
<i>P. Jung and H. Risken</i>	
Dynamics of Nonlinear Stochastic Differential Equations with Multiplicative Colored Noise	270
<i>A. Hernández-Machado and M. San Miguel</i>	
Relaxation Time of Nematics in a Random Magnetic Field	276
<i>F. Sagués and M. San Miguel</i>	
Analysis of Neutron Fluctuations in a Nuclear Power Reactor	282
<i>A. Díaz-Guilera, J. M. Sancho and M. A. Rodríguez</i>	
External Fluctuations with Finite Size Effects	287
<i>M. San Miguel, M. A. Rodriguez, L. Pesquera and J. M. Sancho</i>	
Friction, Diffusion and Velocity Correlation Function in Suspensions of Dipolar Particles	293
<i>J. M. Rubí and A. Pérez-Madrid</i>	
Generalized H-Theorems for Quasi-Markoffian Processes	298
<i>J. L. del Rio Correa</i>	
A Classification of Stationary Fokker-Planck Models	303
<i>H. R. Jauslin</i>	
Stochastic Methods in Quantum Theory: Generalization of the Feynman-Kac Formula	308
<i>P. Claverie and F. Soto</i>	
Selfadjoint Diffusions in Riemannian Manifolds	311
<i>M. Asorey</i>	
List of Participants	319
