PREFACE	vii
Characteristics of Wave Records in the Coastal Zone	1
<i>D. Lee Harris</i>	
Coastal Engineering Research Center, U. S. Army	
A Basic Description of Sediment Transport on Beaches	53
<i>Hans Albert Einstein</i>	
University of California at Berkeley	
Equations for Water Waves and the Approximations behind Them	95
<i>D. Howell Peregrine</i>	
Bristol University and the Mathematics Research Center	
Wave Resonance near Shores	123
<i>M. C. Shen</i>	
The University of Wisconsin and New York University	
Wave Behavior near Caustics in Models and in Nature	163
<i>Willard J. Pierson, Jr.</i>	
New York University	
Harmonic Generation in Shallow Water Waves	181
<i>Chiang C. Mei and Ümit Ünlüata</i>	
Massachusetts Institute of Technology	
Recent Progress in the Study of Longshore Currents	203
<i>M. S. Longuet-Higgins</i>	
Cambridge University and National Institute of Oceanography, England	
Sediment Suspension by Water Waves	249
<i>John F. Kennedy and Frederick A. Locher</i>	
University of Iowa	

CONTENTS

Forms of Sediment Accumulation in the Beach Zone	297
<i>M. O. Hayes</i>	
University of Massachusetts	
Run-up on Beaches	357
<i>R. E. Meyer</i>	
Universities of Wisconsin and Essex	
<i>Albion D. Taylor</i>	
National Oceanic and Atmospheric Administration	
Silver Spring, Maryland	
Wave Breaking in Shallow Water	413
<i>Cyril J. Galvin, Jr.</i>	
Coastal Engineering Research Center, U. S. Army	
INDEX	457
