<b>1 Introduction</b>	<b>1</b>
1.1 Chaos and Nonlinearity	1
1.2 The Kicked Harmonic Oscillator	3
1.3 Examples	9
Exercises	10
<b>2 One-Dimensional Maps</b>	<b>13</b>
2.1 The Tent Map	14
2.2 The Lyapunov Exponent in One Dimension	18
2.3 The Logistic Map	19
2.4 Asymptotic Sets and Bifurcations	25
Exercises	31
<b>3 Universality Theory</b>	<b>33</b>
3.1 Period Doubling and the Composite Functions	33
3.2 Scaling and Self-Similarity in the Logistic Map	47
3.3 Subharmonic Scaling	53
3.4 Experimental Comparisons	58
3.5 Intermittency	60
3.6 Summary	68
Exercises	69
<b>4 Fractal Dimension</b>	<b>71</b>
4.1 Definitions of Fractal Dimension	72
4.2 Classical Examples of Fractal Sets	75
4.3 Attractor for the Universal Quadratic Function	78
4.4 Summary	81
Exercises	82
<b>5 Differential Dynamics</b>	<b>85</b>
5.1 Linearization	86
5.2 Invariant Manifolds	89
5.3 The Poincaré Map	92
5.4 Center Manifolds	96
5.5 Normal Forms	103
5.6 Bifurcations	108
5.7 Summary	110
Exercises	110

<b>6</b>	<b>Nonlinear Examples with Chaos</b>	<b>111</b>
6.1	The Disk Dynamo	112
6.2	Attracting Sets and Trapping Regions	117
6.3	The Lorenz System	119
6.4	The Damped, Driven Pendulum	122
6.5	The Circle Map and the Devil's Staircase	128
6.6	Summary	132
	Exercises	132
<b>7</b>	<b>Two-Dimensional Maps</b>	<b>135</b>
7.1	Fixed Points	135
7.2	Normal Forms	138
7.3	Hopf Bifurcation and Arnold Tongues	142
7.4	The Hénon Map	148
7.5	Renormalization of an Area-Preserving Map	153
7.6	Universality for Area-Preserving Maps	156
7.7	Summary	159
	Exercises	160
<b>8</b>	<b>Conservative Dynamics</b>	<b>161</b>
8.1	Hamiltonian Dynamics and Transformation Theory	162
8.2	Two Examples in Action-Angle Coordinates	165
8.3	Nonintegrable Hamiltonians	168
8.4	Canonical Perturbation Theory and Resonances	171
8.5	The Standard Map	178
8.6	Arnold Diffusion	179
8.7	Summary	181
	Exercises	181
<b>9</b>	<b>Measures of Chaos</b>	<b>183</b>
9.1	Power Spectrum Analysis	183
9.2	Lyapunov Characteristic Exponents Revisited	187
9.3	Information and $K$ -Entropy	196
9.4	Generalized Information, $K$ -Entropy, and Fractal Dimension	199
9.5	Chaos Measures from a Time Series	200
9.6	Summary	202
	Exercises	203
<b>10</b>	<b>Complexity and Chaos</b>	<b>205</b>
10.1	Algorithmic Complexity	206
10.2	The LZ Complexity Measure	207
10.3	Complexity and Simple Maps	211
10.4	Summary	212
	Exercises	213
	Reprise	215
	Glossary	217
	References	221
	Index	227
