CHAPTER 1

Notations and Preliminaries	1
1.1 Row and Column Spaces of a Matrix, Subspaces and Orthogonal Complement, Projection Operator	1
1.2 Canonical Forms of Matrices	4
1.3 Characteristic Function, Minimum Polynomials	7
1.4 Equivalence and Similarity	8
1.5 Special Products of Matrices	11
1.6 Notations	13
Complements	17

CHAPTER 2

Generalized Inverse of a Matrix	19
2.1 Matrices of Full Rank	19
2.2 Definition of a Generalized Inverse	20
2.3 Solution of Consistent Linear Equations	23
2.4 General Representation of g-Inverse	26
2.5 Reflexive g-Inverse	27
2.6 g-Inverse for a Basic Solution of $Ax = y$ (Consistent)	29
2.7 g-Inverse of a Specified Rank	31
2.8 Useful Decomposition Theorems for Matrices	33
2.9 Principal Idempotents of a Square Matrix	35
2.10 Spectral Decomposition of an Arbitrary Matrix	38
Complements	40

CHAPTER 3

Three Basic Types of g-Inverses	44
3.1 g-Inverse for a Minimum Norm Solution of $Ax = y$ (Consistent)	44
3.2 g-Inverse for a Least-Squares Solution of $Ax = y$ (Inconsistent)	48

3.3	g-Inverse for Minimum Norm Least-Squares Solution of $\mathbf{Ax} = \mathbf{y}$ (Inconsistent)	50
3.4	Solution of Matrix Equations	55
3.5	Miscellaneous Expansions of \mathbf{A}^+	61
3.6	g-Inverse of Partitioned Matrices	64
	Complements	67

CHAPTER 4

	Other Special Types of g-Inverse	72
4.1	g-Inverse in Specified Linear Manifolds	72
4.2	g-Inverse of \mathbf{A} with $\mathcal{M}(\mathbf{G}) \subset \mathcal{M}(\mathbf{A})$	73
4.3	g-Inverse of \mathbf{A} with $\mathcal{M}(\mathbf{G}) \subset \mathcal{M}(\mathbf{A})$ and $\mathcal{M}(\mathbf{G}^*) \subset \mathcal{M}(\mathbf{A}^*)$	75
4.4	g-Inverse with the Power Property	77
4.5	A g-inverse that Commutes with the Matrix	79
4.6	A g-Inverse in the Subalgebra Generated by the Matrix	80
4.7	g-Inverse with the Eigenvalue Property	82
4.8	Inverses Commuting with a Power of the Matrix	91
4.9	Some useful Matrix Decomposition Theorems	93
4.10	A Commuting Pseudoinverse and Related Results	95
4.11	Constrained Inverses	98
	Complements	103

CHAPTER 5

	Projectors, Idempotent Matrices and Partial Isometry	106
5.1	Projectors and their Properties	106
5.2	Orthogonal Projector	108
5.3	Explicit Representation of Projectors	109
5.4	Idempotent Matrices	111
5.5	Representation of Idempotent Matrices	112
5.6	Tripotent Matrices	113
5.7	Partial Isometry (Subunitary Transformation)	114
	Complements	118

CHAPTER 6

	Simultaneous Reduction of a Pair of Hermitian Forms	120
6.1	Introduction	120
		121

6.3	Eigenvalues and Vectors of a Matrix with Respect to n.n.d. Matrix	124
6.4	A Pair of Arbitrary Hermitian Forms	127
6.5	Simultaneous Reduction of Several Hermitian Forms	131
	Complements	134
CHAPTER 7		
	Estimation of Parameters in Linear Models	136
7.1	Gauss–Markov Model	136
7.2	Model: $(Y, X\beta, \sigma^2 I)$, β , σ^2 Unknown	139
7.3	Model: $(Y, X\beta R\beta = c, \sigma^2 I)$, σ^2 and β Unknown	144
7.4	Model: $(Y, X\beta, \sigma^2 S)$, β and σ^2 Unknown	147
7.5	Adjustment of Least-Squares Estimates for Addition or Removal of an Observation	150
	Complements	153
CHAPTER 8		
	Conditions for Optimality and Validity of Least-Squares Theory	155
8.1	Introduction	155
8.2	Specification Errors in the Dispersion Matrix	155
8.3	Specification Errors in the Design Matrix	162
8.4	Specification Errors in Design and Dispersion Matrices	165
	Complements	166
CHAPTER 9		
	Distribution of Quadratic Forms	168
9.1	Introduction	168
9.2	Quadratic Functions of Correlated Normal Variables	171
9.3	Some Further Theorems on the Distribution of Quadratic Functions	174
9.4	Independence of Quadratic Forms	177
	Complements	178
CHAPTER 10		
	Miscellaneous Applications of g-Inverses	180
10.1	Applications in Network Theory	180
10.2	Applications to Mathematical Programming Problems	192

10.3 Variance Components	197
10.4 Maximum Likelihood Estimation When the Information Matrix is Singular	201
10.5 Discriminant Function in Multivariate Analysis	203
CHAPTER 11	
Computational Methods	207
11.1 General Formulae	207
11.2 Computation of g-Inverse when Independent Rows or Columns are Identifiable	207
11.3 g-Inverses Based on Factorization of Matrices	209
11.4 Special Techniques	210
11.5 Least Squares Solution	211
Bibliography on Generalized Inverses and Applications	219
Author Index	235
Subject Index	237
