

CONTENTS

Renormalization group in modern physics <i>D. V. Shirkov</i>	1
---	---

QUANTUM FIELD THEORY

Renormalization group in lattice gauge theories <i>Yu. M. Makeenko</i>	35
Applications of the reduction method <i>W. Zimmermann</i>	51
Multiloop calculations and renormalization group <i>K. G. Chetyrkin</i>	65
Nonrenormalization theorems for chiral anomalies and their applications <i>O. Piguet & K. Sibold</i>	96
Renormalization group invariance in the presence of an instanton <i>D. A. Ross</i>	116

TURBULENCE

Scaling in strong turbulence and kinetics <i>S. S. Moiseev, A. V. Tur and V. V. Yanovsky</i>	131
Quantum field renormalization group in the theory of turbulence and in magnetic hydrodynamics <i>A. N. Vasiliev</i>	146
Low frequency plasma turbulence <i>R. N. Sudan</i>	160

Elementary renormgroup model of turbulent heat transfer 171
V. N. Shtern

The renormgroup description of spatial turbulence development 189
I. S. Aranson & M. I. Rabinovich

DYNAMICAL SYSTEMS

Chaos border and statistical anomalies 221
B. V. Chirikov & D. L. Shepelyansky

Renormalization group method in the theory of dynamical systems 251
Ya. G. Sinai & K. M. Khanin

Universalities and scaling at the transition to chaos through
 homoclinic bifurcations 278
D. V. Lyubimov, A. S. Pikovsky & M. A. Zaks

Dynamical and spectral properties of interacting quantum
 non-linear resonances 290
G. P. Berman, F. M. Izrailev, A. R. Kolovsky & O. F. Vlasova

Problems related to dynamical systems 313
R. Lima

The Feigenbaum universality and multipliers of 2^n -cycles for
 multidimensional systems 331
V. Yu. Sedov, A. I. Khibnik & M. V. Jakobson

CRITICAL PHENOMENA

Liquid-gas critical point 351
I. R. Yukhnovskii, I. M. Idzyk & V. A. Kolomijets

On the region of applicability of renormalization group relations
 for the second order phase transition 367
M. P. Kozlovskii

The conception of the metallic order parameter and the critical exponents in the metal-dielectric transition theory 389

R. O. Zaitsev

PERCOLATION, POLYMERS, TRANSFER THEORY

The excluded volume problem for polymer chains 405

V. I. Alkhimov

The dynamic RG approach to the statistical theory of biopolymers 424

E. I. Shakhnovich & A. Yu. Grosberg

Renorm-group analogies in astrophysics 437

M. A. Mnatsakanian

List of participants 467
