

CONTENTS

Chapter I

HAMILTON'S PRINCIPLE AND THE THEORY OF THE FIRST VARIATION

1

§1. VARIATIONAL PROBLEMS IN ONE INDEPENDENT VARIABLE, 1

1. Newton's Equations of Motion, 1
2. The Euler-Lagrange Equation, 7

§2. VARIATIONAL PROBLEMS IN TWO AND MORE INDEPENDENT VARIABLES, 15

1. Vibrations of a Stretched String, 15
2. The Euler-Lagrange Equation for the Two-Dimensional Problem, 16

§3. THE ISOPERIMETRIC PROBLEM, 22

1. The Problem of Dido, 22
2. The Euler-Lagrange Equation for the Isoperimetric Problem in One Independent Variable, 23

§4. NATURAL BOUNDARY CONDITIONS, 28

1. A Problem of Zermelo in Modified Form, 28
2. Natural Boundary Conditions for the One-Dimensional Problem, 29
3. Natural Boundary Condition for the Two-Dimensional Problem, 30

Chapter II**REPRESENTATION OF SOME PHYSICAL PHENOMENA
BY PARTIAL DIFFERENTIAL EQUATIONS****34****§1. THE VIBRATING STRING, 34**

1. Vibrations of a Stretched String—Vectorial Approach, 34
2. An Attempt to Solve a Specific String Problem, 37
3. Boundary and Initial Conditions in Differential Equations, 42
4. Boundary and Initial Value Problem for the String, 45
5. The Uniqueness of the Solution of the String Equation, 46

§2. THE VIBRATING MEMBRANE, 49

1. Vibrations of a Stretched Membrane, 49
2. The Vibrations of a Membrane as a Variational Problem, 53
3. The Boundary and Initial Value Problem for the Membrane, 55
4. An Attempt to Solve a Specific Membrane Problem, 58
5. The Uniqueness of the Solution of the Membrane Equation, 62

**§3. THE EQUATION OF HEAT CONDUCTION AND
THE POTENTIAL EQUATION, 66**

1. Heat Conduction without Convection, 66
2. The Potential Equation, 69
3. The Initial and Boundary Value Problem for Heat Conduction, 72
4. Stationary Temperature Distribution Generated by a Spherical Stove, 74
5. The Uniqueness of the Solution of the Potential Equation, 77
6. The Uniqueness of the Solution of the Heat Equation, 79

Chapter III**THEOREMS RELATED TO PARTIAL DIFFERENTIAL EQUATIONS AND THEIR SOLUTIONS 82**

- §1. GENERAL REMARKS ON THE EXISTENCE AND UNIQUENESS OF SOLUTIONS, 82
 - 1. The Problem of Minimal Surfaces, 82
 - 2. The Problem of Cauchy-Kowalewski, 85
- §2. INFINITE SERIES AS SOLUTIONS OF LINEAR HOMOGENEOUS PARTIAL DIFFERENTIAL EQUATIONS WITH HOMOGENEOUS BOUNDARY OR INITIAL CONDITIONS, 88
 - 1. Bernoulli's Separation Method, 88
 - 2. Solution of the Homogeneous Boundary Value Problem by Infinite Series, 91

Chapter IV**FOURIER SERIES 95**

- §1. THE FORMAL APPROACH, 95
 - 1. Introductory Remarks, 95
 - 2. Approximation of a Given Function by a Trigonometric Polynomial, 96
 - 3. The Trigonometric Functions as an Orthogonal System, 97
 - 4. Approximations by Trigonometric Polynomials, Continued, 101
 - 5. Formal Expansion of a Function into a Fourier Series, 102
 - 6. Formal Rules for the Evaluation of Fourier Coefficients, 103
- §2. THE THEORY OF FOURIER SERIES, 105
 - 1. Illustrative Examples, 105
 - 2. Convergence of Fourier Series, 111
 - 3. The Convergence Proof, 113
 - 4. Bessel's Inequality, 118
 - 5. Absolute and Uniform Convergence of Fourier Series, 120

6. Completeness, 126
7. Integration and Differentiation of Fourier Series, 129

§3. APPLICATIONS, 132

1. The Plucked String, 132
2. The Validity of the Solution of the String Equation for a Displacement Function with a Sectionally Continuous Derivative, 136
3. The General Solution of the String Problem—D'Alembert's Method, 140

Chapter V

SELF-ADJOINT BOUNDARY VALUE PROBLEMS

145

§1. SELF-ADJOINT DIFFERENTIAL EQUATIONS OF THE SECOND ORDER, 145

1. Self-adjoint Differential Equations, 145
2. Examples, 150
3. The x, ϕ -Diagram, 152
4. The Zeros of the Solutions of a Self-adjoint Differential Equation, 154

§2. THE SELF-ADJOINT BOUNDARY VALUE PROBLEM OF STURM AND LIOUVILLE, 163

1. Eigenvalues and Eigenfunctions, 163
2. The Sturm-Liouville Problem in the x, ϕ -Diagram, 167
3. Number and Distribution of the Eigenvalues of the Sturm-Liouville Boundary Value Problem, 168
4. The Orthogonality of Eigenfunctions, 175
5. Fourier Expansions in Terms of Eigenfunctions, 177
6. Completeness and the Expansion Problem, 178

Chapter VI

LEGENDRE POLYNOMIALS AND BESSEL FUNCTIONS

182

§1. THE LEGENDRE EQUATION AND LEGENDRE POLYNOMIALS, 182

1. Series Solution of a Linear Differential Equation of the Second Order with Analytic Coefficients, 182
2. Series Solutions of the Legendre Equation, 188

3. Polynomial Solutions of the Legendre Equation, 193
 4. Generating Function—Legendre Polynomials, 194
 5. Orthogonality and Normalization, 198
 6. Legendre Functions of the Second Kind, 201
 7. Legendre Polynomials as Potentials of Multipoles with Respect to an Action Point at Unit Distance, 202
- §2. THE BESSEL EQUATION AND BESSEL FUNCTIONS, 204
1. Introductory Remarks, 204
 2. Solution of a Linear Differential Equation of the Second Order at a Regular Singular Point, 209
 3. Bessel Functions of Integral Order, 214
 4. Bessel Functions of Nonintegral Order and of Negative Order, 216
 5. The Linear Independence of Two Solutions of Bessel's Equation of Nonintegral Order, 220
 6. Bessel Functions of the Second Kind, 222
 7. Circular Membrane with Axially Symmetric Initial Displacement, 227
 8. The Normalization of the Bessel Functions, 230
 9. Integral Representation of Bessel Functions of Integral Order, 232
 10. The Almost-Periodic Behavior of the Functions $\sqrt{x} J_\rho(x)$, 235

Chapter VII

CHARACTERIZATION OF EIGENVALUES BY A VARIATIONAL PRINCIPLE

239

- §1. INTRODUCTION AND GENERAL EXPOSITION, 239
1. The Sturm-Liouville Equation as Euler-Lagrange Equation of a Certain Isoperimetric Problem, 239
 2. Numerical Examples, 241
 3. Minimizing Sequences, 244
 4. The Existence of a Minimum, 248
- §2. MINIMUM PROPERTIES OF THE EIGENVALUES OF A SELF-ADJOINT BOUNDARY VALUE PROBLEM, 253
1. The Solutions of a Certain Isoperimetric Problem as the Eigenfunctions of a Self-adjoint Boundary Value Problem, 253

2. The Eigenfunctions of the Sturm-Liouville Boundary Value Problem as Solutions of the Associated Variational Problem, 260

§3. THE METHOD OF RAYLEIGH AND RITZ, 269

1. Theorems Regarding the Secular Equation, 269
2. The Method of Rayleigh and Ritz, 273
3. The Eigenvalues of Ritz's Problem as Upper Bounds for the Eigenvalues of the Original Problem, 279
4. Successive Approximations to the Eigenvalues from Above, 281
5. Numerical Examples, 284

Chapter VIII

SPHERICAL HARMONICS

288

§1. ASSOCIATED LEGENDRE FUNCTIONS, SPHERICAL HARMONICS, AND LAGUERRE POLYNOMIALS, 288

1. The Equation of Wave Propagation, 288
2. Schroedinger's Wave Equation, 292
3. The Hydrogen Atom, 296
4. Legendre's Associated Equation, 299
5. Spherical Harmonics, 300
6. Laguerre Polynomials and Associated Functions, 302
7. Solution of Schroedinger's Equation for the Hydrogen Atom, 305

§2. SPHERICAL HARMONICS AND POISSON'S INTEGRAL, 308

1. Stationary Temperature Distribution Generated by a Spherical Stove, 308
2. Fourier Expansion in Terms of Associated Legendre Functions, 311
3. Poisson's Integral Representation of the Solution of the Potential Equation, 314
4. Expansion in Terms of Laplace Coefficients, 316

Chapter IX**THE NONHOMOGENEOUS BOUNDARY VALUE
PROBLEM****322****§1. THE INFLUENCE FUNCTION (GREEN'S FUNCTION), 322**

1. The Nonhomogeneous String Equation, 322
2. Determination of Green's Function, 323
3. Examples, 326
4. A General Discussion of the Nonhomogeneous and the Associated Homogeneous Boundary Value Problem, 329
5. The Existence of Green's Function, 331

§2. THE GENERALIZED GREEN FUNCTION, 335

1. Construction of Green's Function in the Case Where the Associated Homogeneous Boundary Value Problem Has a Nontrivial Solution, 335
2. Examples, 340

§3. FURTHER ASPECTS OF GREEN'S FUNCTION, 344

1. Green's Function and the Sturm-Liouville Boundary Value Problem, 344
2. Green's Function for Partial Differential Equations, 348

APPENDIX**353****KEY FOR REFERENCE SYMBOLS USED IN THE
APPENDIX, 353****I. VECTOR ANALYSIS, 354**

- A. Vector Operations, 354
- B. Differential Operations, 355
- C. Integral Theorems, 358

II. CONVERGENCE, 359

- A. Definitions, 359
- B. Convergence Tests, 360
- C. Theorems, 360
- D. Power Series, 361

III. ORDINARY DIFFERENTIAL EQUATIONS, 362**A. Theorem on Implicit Functions, 362****B. Systems of Ordinary Differential Equations of the
First Order, 363****ANSWERS AND HINTS TO EVEN NUMBERED
PROBLEMS****365****INDEX****375**
