

CONTENTS

Preface	vii
List of Contributors	ix
Fluctuations, Oscillations and Instabilities in Liquid Crystal Devices <i>M G Clark</i>	1
Cryogenic Fluids as Test Systems for Understanding Rayleigh-Bénard Convection <i>P G J Lucas</i>	42
Chemical Reactions in Isothermal Systems: Oscillations and Instabilities <i>S K Scott and P Gray</i>	70
Symmetry Breaking and the Onset of Time Dependence in Fluid Mechanical Systems <i>T Mullin and K A Cliffe</i>	96
On the Qualitative Analysis of Experimental Dynamical Systems <i>D S Broomhead and G P King</i>	113
Studies of a Complex Duffing Equation in Nonlinear Waves on Plane Poiseuille Flow <i>C A Holmes and D Wood</i>	145
Quantisation of Chaos and Limit Cycles in Dissipative Systems <i>S Sarkar and J S Satchell</i>	171
Solitons and Chaos in the Pumped Nonlinear Schrödinger Equation <i>K J Blow</i>	198
Plane Wave and Modulational Instabilities in Passive Optical Resonators <i>J V Moloney</i>	214
Modulational Instabilities in Homogeneously Broadened Lasers <i>J N Elgin, J S D Gibbon, J B Molina Garza and D Wood</i>	246
Stability of Equilibria of Hamiltonian Systems <i>R S MacKay</i>	254
Calculation of Transport Coefficients in Chaotic Systems <i>A S Bland and G Rowlands</i>	271
Analytic Methods for Predicting Chaos <i>A C Fowler</i>	284
Regular and Chaotic Billiard Dynamics in Magnetic Fields <i>M Robnik</i>	303
Index	331
