CONTENTS

C. Small Perturbation Theory 3

W. R. Sears, Graduate School of Aeronautical Engineering, Cornell University, Ithaca, New York

1. Introduction 3
2. The Equation of Sound Propagation 5
3. The Prandtl-Glauert Equation 6
4. Application to Wing Theory 8
5. Application to Other Bodies 16
6. Pressure-Correction Formulas for Steady Flow 24
7. The Critical Mach Number 27
8. Experimental Confirmation 30
9. The Slender Body Theory of Munk and Jones 38
10. Rotational Small Perturbation Flow 42
11. The Stream Function in Rotational Steady Flow 52
12. Unsteady and Periodic Flow Problems. Fundamental Solutions 58
13. Cited References 61
