Preface	xii	
CHAPTER ONE	Introduction	1
1.1	Basic Concepts and Definitions	1
1.2	Mathematical Problems	4
1.3	Linear Operators	5
1.4	Superposition	7
Exercises		9
CHAPTER TWO	Mathematical Models	11
2.1	The Classical Equations	11
2.2	The Vibrating String	11
2.3	The Vibrating Membrane	13
2.4	Waves in Elastic Medium	15
2.5	Conduction of Heat in Solids	20
2.6	The Gravitational Potential	21
Exercises		23
CHAPTER THREE	Classification of Second-order Equations	26
3.1	Second-order Equations in Two Independent Variables	26
3.2	Canonical Forms	28
3.3	Equations with Constant Coefficients	34
3.4	General Solution	38
3.5	Summary and Further Simplification	40
Exercises		41
CHAPTER FOUR	The Cauchy Problem	43
4.1	The Cauchy Problem	43
4.2	Cauchy–Kowalewsky Theorem	46

4.3 Homogeneous Wave Equation	47
4.4 Initial-boundary Value Problems	55
4.5 Nonhomogeneous Boundary Conditions	58
4.6 Finite String with Fixed Ends	60
4.7 Nonhomogeneous Wave Equation	63
4.8 Riemann Method	66
4.9 Goursat Problem	73
Exercises	77
CHAPTER FIVE Fourier Series	82
5.1 Piecewise Continuous Functions	82
5.2 Even and Odd Functions	85
5.3 Periodic Functions	88
5.4 Orthogonality	89
5.5 Fourier Series	90
5.6 Convergence in the Mean	92
5.7 Examples of Fourier Series	93
5.8 Cosine and Sine Series	98
5.9 Complex Fourier Series	102
5.10 Change of Interval	104
5.11 Pointwise Convergence	107
5.12 Uniform Convergence	112
5.13 Differentiation and Integration	115
5.14 Double Fourier Series	120
Exercises	122
CHAPTER SIX Method of Separation of Variables	128
6.1 Separation of Variables	128
6.2 The Vibrating String Problem	131
6.3 Existence and Uniqueness of Solution of the Vibrating String Problem	136
6.4 The Heat Conduction Problem	142
6.5 Existence and Uniqueness of Solution of the Heat Conduction Problem	145
6.6 The Laplace and Beam Equations	148
6.7 Nonhomogeneous Problems	151
6.8 Finite Fourier Transforms	158
Exercises	162
CHAPTER SEVEN Eigenvalue Problems	171
7.1 Sturm–Liouville Systems	171
7.2 Eigenvalues and Eigenfunctions	174
7.3 Eigenfunction Expansions	179
7.4 Convergence in the Mean	181
7.5 Completeness and Parseval's Equality	182
7.6 Bessel's Equation	186
7.7 Adjoint Forms: Lagrange Identity	191
7.8 Singular Sturm–Liouville Systems	193

7.9 Legendre's Equation	198
7.10 Boundary Value Problems Involving Ordinary Differential Equations	204
7.11 Green's Function	206
7.12 Construction of Green's Function	211
7.13 Nonhomogeneous Boundary Conditions	214
7.14 Eigenvalue Problems and Green's Function	216
Exercises	218
CHAPTER EIGHT Boundary Value Problems	223
8.1 Boundary Value Problems	223
8.2 Maximum and Minimum Principles	225
8.3 Uniqueness and Continuity Theorems	227
8.4 Dirichlet Problem for a Circle	228
8.5 Dirichlet Problem for a Circular Annulus	232
8.6 Neumann Problem for a Circle	234
8.7 Dirichlet Problem for a Rectangle	235
8.8 Dirichlet Problem Involving Poisson Equation	238
8.9 Neumann Problem for a Rectangle	240
Exercises	243
CHAPTER NINE Higher Dimensional Problems	251
9.1 Dirichlet Problem for a Cube	251
9.2 Dirichlet Problem for a Cylinder	253
9.3 Dirichlet Problem for a Sphere	256
9.4 Wave and Heat Equations	260
9.5 Vibrating Membrane	261
9.6 Heat Flow in a Rectangular Plate	263
9.7 Waves in Three Dimensions	265
9.8 Heat Conduction in a Rectangular Volume	266
9.9 The Hydrogen Atom	267
9.10 Method of Eigenfunctions	270
9.11 Forced Vibration of Membrane	271
9.12 Time-dependent Boundary Conditions	273
Exercises	276
CHAPTER TEN Green's Function	282
10.1 The Delta Function	282
10.2 Green's Function	283
10.3 Method of Green's Function	285
10.4 Dirichlet Problem for the Laplace Operator	287
10.5 Dirichlet Problem for the Helmholtz Operator	290
10.6 Method of Images	291
10.7 Method of Eigenfunctions	294
10.8 Higher Dimensional Problems	297
10.9 Neumann Problem	300
Exercises	302

CHAPTER ELEVEN Integral Transforms	306
11.1 Fourier Transforms	306
11.2 Properties of Fourier Transform	312
11.3 Convolution (Fourier Transform)	316
11.4 Step Function and Impulse Function (Fourier Transform)	319
11.5 Semiinfinite Region	322
11.6 Hankel and Mellon Transforms	324
11.7 Laplace Transforms	325
11.8 Properties of Laplace Transforms	327
11.9 Convolution (Laplace Transform)	331
11.10 Step Function and Impulse Function (Laplace Transform)	334
11.11 Application of Green's Function	341
Exercises	343
APPENDIX	351
I Gamma Function	351
II Table of Fourier Transforms	352
III Table of Laplace Transforms	353
BIBLIOGRAPHY	355
ANSWERS TO EXERCISES	359
INDEX	377
