

# CONTENTS

PREFACE .....	9
Chapter 1. Certain Numerical Methods	13
1.1 Numerical integration .....	14
1.2 Computing sums by means of integrals .....	20
1.3 Numerical solution of equations .....	28
Answers and Solutions .....	36
Chapter 2. Mathematical Treatment of Experimental Results	39
2.1 Tables and differences .....	39
2.2 Integration and differentiation of tabulated functions..	44
2.3 Fitting of experimental data by the least-squares method	49
2.4 The graphical method of curve fitting .....	55
Answers and Solutions .....	62
Chapter 3. More on Integrals and Series	65
3.1 Improper integrals .....	65
3.2 Integrating rapidly varying functions .....	73
3.3 Stirling's formula .....	82
3.4 Integrating rapidly oscillating functions .....	84
3.5 Numerical series .....	88
3.6 Integrals depending on a parameter .....	99
Answers and Solutions .....	103
Chapter 4. Functions of Several Variables	108
4.1 Partial derivatives .....	108
4.2 Geometrical meaning of a function of two variables ..	115
4.3 Implicit functions .....	118
4.4 Electron tube .....	126
4.5 Envelope of a family of curves .....	129
4.6 Taylor's series and extremum problems .....	131
4.7 Multiple integrals .....	139
4.8 Multidimensional space and number of degrees of freedom .....	150
Answers and Solutions .....	154
Chapter 5. Functions of a Complex Variable	158
5.1 Basic properties of complex numbers .....	158
5.2 Conjugate complex numbers .....	161
5.3 Raising a number to an imaginary power. Euler's formula .....	164
5.4 Logarithms and roots .....	169

5.5	Describing harmonic oscillations by the exponential function of an imaginary argument .....	173
5.6	The derivative of a function of a complex variable....	180
5.7	Harmonic functions .....	182
5.8	The integral of a function of a complex variable ....	184
5.9	Residues .....	190
	Answers and Solutions .....	199
	Chapter 6. Dirac's Delta Function .....	203
6.1	Dirac's delta function $\delta(x)$ .....	203
6.2	Green's function .....	208
6.3	Functions related to the delta function .....	214
6.4	On the Stieltjes integral .....	221
	Answers and Solutions .....	223
	Chapter 7. Differential Equations .....	225
7.1	Geometric meaning of a first-order differential equation .....	225
7.2	Integrable types of first-order equations .....	229
7.3	Second-order homogeneous linear equations with constant coefficients .....	236
7.4	A simple second-order nonhomogeneous linear equation .....	242
7.5	Second-order nonhomogeneous linear equations with constant coefficients .....	249
7.6	Stable and unstable solutions .....	256
	Answers and Solutions .....	261
	Chapter 8. Differential Equations Continued .....	263
8.1	Singular points .....	263
8.2	Systems of differential equations .....	265
8.3	Determinants and the solution of linear systems with constant coefficients .....	270
8.4	Lyapunov stability of the equilibrium state .....	274
8.5	Constructing approximate formulas for a solution ....	277
8.6	Adiabatic variation of a solution .....	285
8.7	Numerical solution of differential equations .....	288
8.8	Boundary-value problems .....	297
8.9	Boundary layer .....	303
8.10	Similarity of phenomena .....	305
	Answers and Solutions .....	309
	Chapter 9. Vectors .....	312
9.1	Linear operations on vectors .....	313
9.2	The scalar product of vectors .....	319
9.3	The derivative of a vector .....	321
9.4	The motion of a material point .....	324
9.5	Basic facts about tensors .....	328
9.6	Multidimensional vector space .....	333
	Answers and Solutions .....	336

Chapter 10. Field Theory	340
10.1 Introduction	340
10.2 Scalar field and gradient	341
10.3 Potential energy and force	345
10.4 Velocity field and flux	351
10.5 Electrostatic field, its potential and flux	356
10.6 Examples	359
10.7 General vector field and its divergence	369
10.8 The divergence of a velocity field and the continuity equation	374
10.9 The divergence of an electric field and the Poisson equation	376
10.10 An area vector and pressure	379
Answers and Solutions	384
Chapter 11. Vector Product and Rotation	388
11.1 The vector product of two vectors	388
11.2 Some applications to mechanics	392
11.3 Motion in a central-force field	396
11.4 Rotation of a rigid body	406
11.5 Symmetric and antisymmetric tensors	408
11.6 True vectors and pseudovectors	415
11.7 The curl of a vector field	416
11.8 The Hamiltonian operator $\text{del}$	423
11.9 Potential fields	426
11.10 The curl of a velocity field	430
11.11 Magnetic field and electric current	433
11.12 Electromagnetic field and Maxwell's equations	438
11.13 Potential in a multiply connected region	442
Answers and Solutions	445
Chapter 12. Calculus of Variations	450
12.1 An instance of passing from a finite number of degrees of freedom to an infinite number	450
12.2 Functional	456
12.3 Necessary condition of an extremum	460
12.4 Euler's equation	462
12.5 Does a solution always exist?	468
12.6 Variants of the basic problem	474
12.7 Conditional extremum for a finite number of degrees of freedom	476
12.8 Conditional extremum in the calculus of variations	479
12.9 Extremum problems with restrictions	488
12.10 Variational principles. Fermat's principle in optics	491
12.11 Principle of least action	499
12.12 Direct methods	503
Answers and Solutions	508

Chapter 13. Theory of Probability	514
13.1 Statement of the problem	514
13.2 Multiplication of probabilities	517
13.3 Analysing the results of many trials	522
13.4 Entropy	533
13.5 Radioactive decay. Poisson's formula	539
13.6 An alternative derivation of the Poisson distribution	542
13.7 Continuously distributed quantities	544
13.8 The case of a very large number of trials	549
13.9 Correlational dependence	556
13.10 On the distribution of primes	561
Answers and Solutions	567
Chapter 14. Fourier Transformation	573
14.1 Introduction	573
14.2 Formulas of the Fourier transformation	577
14.3 Causality and dispersion relations	585
14.4 Properties of the Fourier transformation	589
14.5 Bell-shaped transformation and the uncertainty principle	597
14.6 Harmonic analysis of a periodic function	602
14.7 Hilbert space	606
14.8 Modulus and phase of spectral density	612
Answer and Solutions	615
Chapter 15. Digital Computers	619
15.1 Analogue computers	619
15.2 Digital computers	621
15.3 Representation of numbers and instructions in digital computers	623
15.4 Programming	628
15.5 Use computers!	634
Answers and Solutions	642
REFERENCES	645
INDEX	646
