PART I: ATOMIC STRUCTURE

<i>Introduction</i>	3
1 Bohr's Lecture before the Physical Society of Copenhagen (15 December 1920)	7
2 Atomic Structure. Letter to "Nature" (24 March 1921)	10
3 Our Present Knowledge of Atoms (1921)	14
4 Second Half of the Solvay Report (1921)	14
5 Atomic Structure. Letter to "Nature" (13 October 1921)	19
6 The Structure of the Atom and the Physical and Chemical Properties of the Elements. Lecture delivered on 18 October 1921 before a joint meeting of the Physical and Chemical Societies of Copenhagen	20
7 Seven Lectures on the Theory of Atomic Structure held in Göttingen (12–22 June 1922)	23
8 On the Explanation of the Periodic System. Abstract of a lecture delivered before the Second Nordic Physics Conference held at Uppsala, Sweden, 24–26 August 1922	25
9 The Nobel Prize (1922) Speech by Niels Bohr at the Banquet in Stockholm after receiving the Nobel Prize (December 1922)	25 26
10 The Discovery of Hafnium (1922)	30
11 X-Ray Spectra and the Periodic System of the Elements (with D. Coster, 1923)	32
12 Line Spectra and Atomic Structure (1923)	34
13 The Problem of Helium (1916–1923)	36
14 Revision of the Distribution of Electrons in Atoms suggested by Main Smith and Stoner (1924)	40

CONTENTS

I	<i>Some Considerations of Atomic Structure. Lecture delivered before the Physical Society of Copenhagen (15 December 1920)</i>	43
	Translation from Danish text	
1	Our Knowledge of Atoms (fragmentary introduction)	44
2	Some Considerations about the Constitution of Atoms (fragmentary introduction)	46
3	Main Body of the Lecture	48
II	<i>Atomic Structure (March 1921)</i>	71
III	<i>Our Present Knowledge of Atoms (1921)</i>	83
	Translation from German text	
IV	<i>Extract of Second Half of Solvay Report (1921)</i>	91
V	<i>Constitution of Atoms (1921)</i>	99
1	Interpretation of the Series Spectra of the Elements	100
2	Helium	122
3	On the Elements within the Second Period of the Periodic System	140
4	The Correspondence Principle	148
5	On the General Interpretation of the Periodic Table	153
VI	<i>Atomic Structure (October 1921)</i>	175
VII	<i>The Structure of the Atom and the Physical and Chemical Properties of the Elements (1921–1922)</i>	181
	Danish text	183
	Translation	257
VIII	<i>Seven Lectures on the Theory of Atomic Structure (Göttingen 1922)</i>	341
	Translation	
IX	<i>On the Explanation of the Periodic System (1922)</i>	421
	Translation from Danish text	
X	<i>The Structure of the Atom (1922)</i>	425
	Danish text	427
	Translation	467
XI	<i>X-Ray Spectra and the Periodic System of the Elements (with D. Coster, 1923)</i>	483
	German text	485
	Translation	519
XII	<i>Line Spectra and Atomic Structure (1923)</i>	549
	German text	550
	Translation	611
XIII	<i>Atom (1926)</i>	657

CONTENTS

PART II: SELECTED CORRESPONDENCE 1920–1924

<i>Introduction</i>	667
<i>M. Born</i>	668
<i>D. Coster</i>	674
<i>P. Ehrenfest</i>	682
<i>A. Einstein</i>	684
<i>P. S. Epstein</i>	687
<i>K. Fajans</i>	690
<i>J. Franck</i>	692
<i>H. Konen</i>	701
<i>W. Kossel</i>	706
<i>R. Ladenburg</i>	709
<i>A. Landé</i>	718
<i>I. Langmuir</i>	724
<i>H. A. Lorentz</i>	727
<i>J. C. McLennan</i>	728
<i>C. W. Oseen</i>	730
<i>A. Rubinowicz</i>	732
<i>E. Schrödinger</i>	736
<i>A. Sommerfeld</i>	739

INVENTORY OF MANUSCRIPTS IN THE NIELS BOHR ARCHIVE

<i>Documents Related to the Application of the Correspondence Principle and to the Interpretation of the Periodic System</i>	743
