PART I: THE THEORY OF BOHR, KRAMERS AND SLATER

<i>Introduction</i>	3
1 The Nature of Light	3
2 Slater's Theory of Radiation (1923–1924)	6
<i>J.C. Slater, Radiation and Atoms, Nature 113 (1924) 307–308</i>	12
3 Doubts about the Validity of the Law of Conservation of Energy	13
4 "The Quantum Theory of Radiation" (1924)	19
5 Reception of the Bohr–Kramers–Slater Theory	23
6 "On selective reflection of X-rays" (1924)	38
7 Kramers' Dispersion Theory (1923–1924)	40
<i>H.A. Kramers, The Law of Dispersion and Bohr's Theory of Spectra, Nature 113 (1924) 673–674</i>	44
<i>H.A. Kramers, The Quantum Theory of Dispersion, Nature 114 (1924) 310–311</i>	45
8 "The Foundations of Modern Atomic Research" (22 October 1924)	47
9 "On the Polarization of Fluorescent Light" (1924)	48
10 Discussion of the Polarization of Fluorescent Light	55
11 Further Discussions with Slater	65
12 "On the Behaviour of Atoms in Collisions" (1925)	69
13 Experimental Test of the Theory (1924–1925)	75
14 Abandonment of the Bohr–Kramers–Slater Hypothesis	80
15 Bohr's Addendum ("Nachschrift") (1925)	89
16 Epilogue (1927; 1929 ff.; 1935–1936)	93
I <i>Abstract of "The Quantum Theory of Radiation"</i> (with H.A. Kramers and J.C. Slater), <i>Z. Phys.</i> 24 (1924) 69	97
Translation	98

CONTENTS

II	<i>The Quantum Theory of Radiation</i> (with H.A. Kramers and J.C. Slater), <i>Phil. Mag.</i> 47 (1924) 785–802	99
III	<i>On selective reflection of X-rays</i> (1924); Unpublished Manuscript	119
IV	<i>The Foundations of Modern Atomic Research; Grundlaget for den moderne Atomforskning</i> , <i>Fys. Tidsskr.</i> 23 (1925) 10–17	125
	Translation	136
V	<i>On the Polarization of Fluorescent Light; Zur Polarisation des Fluoreszenzlichtes</i> , <i>Naturwiss.</i> 12 (1924) 1115–1117	143
	Translation	148
VI	<i>Two Fragments of Manuscripts [1924 and/or 1925]</i>	155
	1 First Fragment, <i>Zur Rydberg–Ritzschen Formel</i>	157
	Translation	161
	2 Second Fragment	165
	Translation	168
VII	<i>On the Law of Conservation of Energy (Abstract); Om Energisætningen</i> , <i>Overs. Dan. Vidensk. Selsk. Forh.</i> Juni 1924–Maj 1925, p. 32	173
	<i>On the law of conservation of energy</i> , <i>Nature</i> 116 (1925) 262	174
VIII	<i>On the Behaviour of Atoms in Collisions; Über die Wirkung von Atomen bei Stößen</i> , <i>Z. Phys.</i> 34 (1925) 142–157	175
	Translation	194
IX	<i>Discrepancies between Experiment and the Electromagnetic Theory of Radiation, “Électrons et photons”</i> , <i>Rapports et discussions du cinquième Conseil de physique tenu à Bruxelles du 24 au 29 Octobre 1927</i> , Gauthier-Villars, Paris 1928, pp. 91–92	207
	Translation	211
X	<i>Correlation between Scattering and Recoil in the Compton Effect</i> (Letter by J.C. Jacobsen); <i>Conservation Laws in Quantum Theory</i> (Letter by N. Bohr), <i>Nature</i> 138 (1936) 25–26	213

PART II: MATRIX MECHANICS AND SPINNING ELECTRONS

<i>Introduction</i>		219
	1 “Atomic Theory and Mechanics” (1925)	219
	2 The Elaboration of “Atomic Theory and Mechanics”	222
	3 “Spinning Electrons and the Structure of Spectra” (1926)	226
	4 Kronig’s Anticipation of the Spin Hypothesis	232
	5 Retrospect	238
I	<i>Atomic Theory and Mechanics [1]; Atomteori og Mekanik</i> , <i>Mat. Tidsskr. B</i> , 1925, pp. 104–107	241
	Translation	246
II	<i>Some Aspects of the Recent Development of Atomic Theory [1925]; Nogle Træk af Atomteoriens nyere Udvikling; Outline of Lecture</i>	249
	Translation	252
III	<i>Atomic Theory and Mechanics [2] (1925); Atomteori og Mekanik; Extract of Manuscript</i>	253
	Translation	261
IV	<i>Atomic Theory and Mechanics [3]</i> , <i>Nature (Suppl.)</i> 116 (1925) 845–852	269

CONTENTS

V	<i>Some Aspects of the Later Development of Atomic Theory; Nogle Træk fra Atomteoriens senere Udvikling</i> (Report by H.A. Kramers), <i>Fys. Tidsskr.</i> 24 (1926) 20–21	281
	Translation	284
VI	<i>Spinning Electrons and the Structure of Spectra</i> (Letter by G.E. Uhlenbeck and S. Goudsmit with a Comment by N. Bohr), <i>Nature</i> 117 (1926) 264–265	287

PART III: SELECTED CORRESPONDENCE (MAINLY 1924–1926)

<i>Introduction</i>	293
<i>Correspondence Included</i>	294

Correspondents

<i>Max Born</i>	299
<i>Charles Galton Darwin</i>	314
<i>Bergen Davis</i>	318
<i>William Duane</i>	319
<i>Paul Ehrenfest</i>	326
<i>Ralph Howard Fowler</i>	334
<i>James Franck</i>	340
<i>Hans Geiger</i>	352
<i>Werner Heisenberg</i>	354
<i>George de Hevesy</i>	379
<i>Eric R. Jette</i>	379
<i>Edwin Crawford Kemble</i>	381
<i>Oskar Klein</i>	382
<i>Hendrik Anthony Kramers</i>	394
<i>Ralph de Laer Kronig</i>	397
<i>Rudolf Ladenburg</i>	398
<i>Theodore Lyman</i>	404
<i>Albert Abraham Michelson</i>	404
<i>Carl Wilhelm Oseen</i>	405
<i>Wolfgang Pauli</i>	408
<i>Svein Rosseland</i>	482
<i>Ernest Rutherford</i>	486
<i>Erwin Schrödinger</i>	490
<i>John Clark Slater</i>	492
<i>Arnold Sommerfeld</i>	502
<i>Bartel L. van der Waerden</i>	507

INVENTORY OF MANUSCRIPTS IN THE NIELS BOHR ARCHIVE

<i>Relevant Documents, 1923–1925</i>	511
