

## CONTENTS

	PAGE
C. G. DARWIN (Cambridge): The discovery of atomic number	1
W. HEISENBERG (Göttingen): The development of the interpretation of the quantum theory	12
W. PAULI (Zürich): Exclusion principle, Lorentz group and reflexion of space-time and charge	30
L. D. LANDAU (Moscow): On the quantum theory of fields	52
L. ROSENFELD (Manchester): On quantum electrodynamics	70
O. KLEIN (Stockholm): Quantum theory and relativity	96
H. B. G. CASIMIR (Eindhoven): On the theory of superconductivity	118
F. L. FRIEDMAN and V. F. WEISSKOPF (Cambridge, Mass.): The compound nucleus	134
J. A. WHEELER (Princeton): Nuclear fission and nuclear stability	163
J. LINDHARD (Copenhagen): On the passage through matter of swift charged particles	185
