Editorial Note	xiii
The Less-Developed World: How Can We be Optimists? <i>Abdus Salam</i>	xv
<b>I. SALAM THE MAN</b>	
1. The Lonely Scientists — Thinking Ahead with Abdus Salam	3
2. A Man of Science — Abdus Salam <i>Nigel Calder</i>	12
3. Man of Two Worlds <i>Robert Walgate</i>	24
4. Abdus Salam <i>John Ziman</i>	31
<b>II. SCIENCE AND THE WORLD</b>	
5. Diseases of the Rich and Diseases of the Poor	41
6. Ideals and Realities	45
<b>III. SCIENCE AND TECHNOLOGY IN DEVELOPING COUNTRIES AND INTERNATIONAL COOPERATION</b>	
7. Technology and Pakistan's Attack on Poverty	71
8. Advanced Scientific Research in Developing Countries	85
9. Towards a Scientific Research and Development Policy for Pakistan	91
10. Aiding Physicists in Developing Countries	113
11. Speech at the Nobel Banquet	116
12. The Blindness of the Third World	118
13. A World Federation of Institutes of Advanced Study	128

14. Internationalization of Science in Developing Countries	137
15. Expatriate Nationals and Promotion of Education and Research in Developing Countries	148
16. International Commons: Sharing of International Resources	168
<b>IV. INTERNATIONAL CENTRE FOR THEORETICAL PHYSICS</b>	
17. Need for an International Centre for Theoretical Physics	185
18. A New Centre for Physics	191
19. Address to the UNESCO Executive Board	199
20. Trieste — World Rendezvous for Physicists <i>Dan Behrman</i>	209
21. The International Centre for Theoretical Physics in Trieste <i>C O'Neal</i>	220
<b>V. SCIENCE IN ISLAMIC COUNTRIES</b>	
22. Foundations for Sciences in Islam	231
23. Renaissance of Sciences in Arab and Islamic Lands	239
24. Islamic Science Talent Fund	258
25. The Gulf University and Science in the Arab-Islamic Commonwealth	262
<b>VI. PERSPECTIVES ON PHYSICS</b>	
26. Einstein's Last Dream: The Space-Time Unification of Fundamental Forces	299
27. The Nature of the "Ultimate" Explanation in Physics	310
28. Gauge Unification of Fundamental Forces	320
