Biographical Data – Werner Heisenberg (1901–1976)	1
Werner Heisenberg as Lecturer and Author of Scientific Review Articles and Books	17
Scientific Review Papers, Talks, and Books	
1. Nichtlaminare Lösungen der Differentialgleichungen für reibende Flüssigkeiten / Nonlaminar Solutions for Viscous Fluids	23
2. Quantitatives über die Deformierbarkeit edelgasähnlicher Ionen / Deformability of Noble Gas-Like Ions	27
3. Über quantentheoretische Kinematik und Mechanik / Quantum Theoretical Kinematics and Mechanics	29
4. Quantenmechanik / Quantum Mechanics	52
5. La mécanique des quanta / Mechanics of Quanta (with Max Born)	58
6. Zur Quantentheorie des Ferromagnetismus / Quantum Theory of Ferromagnetism	100
7. Die Entwicklung der Quantentheorie 1918–1928 / Development of Quantum Theory 1918–1928	109
8. The Physical Principles of the Quantum Theory	117
Foreword to the English Edition	118
Preface	118
Contents	119
Introductory	120
Critique of the Physical Concepts of the Corpuscular Theory of Matter	123
Critique of the Physical Concepts of the Wave Theory	131
The Statistical Interpretation of Quantum Theory	133
Discussion of Important Experiments	136
The Mathematical Apparatus of the Quantum Theory	146
Index	166
9. Fortschritte in der Theorie des Ferromagnetismus / Progress in the Theory of Ferromagnetism	167

* The papers are reprinted so as to follow the original publication as closely as possible, being photographically reproduced. For most papers we have kept strict pagewise correspondence, but in the case of three column originals we have broken up the pages; thus the beginning of a new page in the original print is indicated by giving the page number at the margin of the corresponding line in the reprint. In reproducing of the two books, Nos. 8 and 33, four pages of the original have been placed on one page of the reprint.

10. Contribution to Discussion on the Structure of Simple Molecules	171
11. Über die Streuung von Röntgenstrahlen an Molekülen und Kristallen / Scattering of X-Rays by Molecules and Crystals	173
12. Considérations théoriques générales sur la structure du noyau / Theoretical Considerations on the Structure of the Atomic Nucleus	179
13. The Development of Quantum Mechanics	226
14. Bemerkungen zur Theorie des Atomkerns / Remarks on the Theory of the Atomic Nucleus	238
15. Theorie der Schauer / Theory of Showers	247
16. Theoretische Untersuchungen zur Ultrastrahlung / Theoretical Investiga- tions on Cosmic Radiation	248
17. Wahrscheinlichkeitsaussagen in der Quantentheorie der Wellenfelder / Probability Statements in Quantum Field Theory	249
18. Der Durchgang sehr energiereicher Korpuskeln durch den Atomkern / Passage of Very Energetic Corpuscles Through the Atomic Nucleus	256
19. Fortschritte in der Theorie des Atomkerns / Progress in the Theory of the Atomic Nucleus	260
20. Durchgang energiereicher Korpuskeln durch den Atomkern / Passage of Energetic Corpuscles Through the Atomic Nucleus	261
21. Theoretische Gesichtspunkte zur Deutung der kosmischen Strahlung / Theoretical Aspects in the Interpretation of Cosmic Radiation (with H. Euler)	262
22. Das schwere Elektron (Mesotron) und seine Rolle in der Höhenstrahlung / The Heavy Electron and Its Role in Cosmic Radiation	331
23. Elementarteilchen und kosmische Strahlung / Elementary Particles and Cosmic Radiation	333
24. Verwandlung der kosmischen Strahlung in der Atmosphäre / Transformation of Cosmic Radiation in the Atmosphere	334
25. De atoomkern en hare samenstelling / The Constitution of the Atomic Nucleus	335
26. On the Theory of Explosion Showers in Cosmic Rays	345
27. Bericht über die allgemeinen Eigenschaften der Elementarteilchen / Report on the General Properties of Elementary Particles	346
28. Die durchdringende Komponente der Höhenstrahlung / The Penetrating Component of Cosmic Radiation	359
29. Kosmische Strahlung / Cosmic Radiation	360
Inhaltsverzeichnis / Contents	362
Vorwort / Preface	363
Übersicht über den jetzigen Stand unserer Kenntnisse von der kosmischen Strahlung / Present State of Our Knowledge of Cosmic Radiation	365
Die Kaskadentheorie / Cascade Theory	374
Schauer mit durchdringenden Teilchen / Showers with Penetrating Particles (with A. Klemm)	389
Der radioaktive Zerfall der Mesonen / The Radioactive Decay of Mesons	396
Theorie der explosionsartigen Schauer / Theory of Explosion-Like Showers	403
Literaturverzeichnis / References	407

30. Zur Elektronentheorie der Supraleitung / On the Electron Theory of Superconductivity	413
31. Research in Germany on the Technical Application of Atomic Energy	414
32. Großversuche zur Vorbereitung der Konstruktion eines Uranbrenners / Large Scale Experiments for the Construction of a Nuclear Pile (with K. Wirtz) ..	419
33. Two Lectures by W. Heisenberg	443
Contents	444
Preface	444
The Present Situation in the Theory of Elementary Particles	445
The Electron Theory of Superconductivity	449
34. Die Erzeugung von Mesonen in Vielfachprozessen / Meson Production in Multiple Processes	457
35. The Yukawa Theory of Nuclear Forces in the Light of Present Quantum Theory of Wave Fields	468
36. On the Stability of Laminar Flow	471
37. Kosmische Strahlung / Cosmic Radiation	477
Vorwort zur 2. Auflage / Preface to the Second Edition	478
Inhaltsverzeichnis / Contents	479
Übersicht über den heutigen Stand der Kenntnisse von der kosmischen Strahlung / Review of the Present Knowledge of Cosmic Radiation	483
Theorie der Explosionsschauer / Theory of Explosion-Like Showers	491
Literaturverzeichnis / References	508
38. Doubts and Hopes in Quantum-Electrodynamics	509
39. Remarques sur la théorie neutrinienne de la lumière / Remarks on the Neutrino Theory of Light	521
40. Quantization of Non-Linear Wave Equations	524
41. The Production of Mesons in Very High Energy Collisions	527
42. Theory of Elementary Particles	535
43. Der gegenwärtige Stand der Theorie der Elementarteilchen / The Present State of the Theory of Elementary Particles	547
44. Quantum Theory of Fields and Elementary Particles	552
45. General Remarks Concerning the Theory of Elementary Particles	562
46. Research on the Non-Linear Spinor Theory with Indefinite Metric in Hilbert Space	563
47. Allgemeiner Überblick und Fortschritte in der Theorie der Elementarteilchen / General Review and Progress of the Theory of Elementary Particles ..	571
48. Recent Research on the Nonlinear Spinor Theory of Elementary Particles ...	572
49. Der derzeitige Stand der nichtlinearen Spinortheorie der Elementarteilchen / The Present State of the Nonlinear Spinor Theory	580
50. Theory of the Strange Particles (with H.-P. Dürr)	592
51. Electrodynamics in the Non-linear Spinor Theory	598
52. Elektrodynamik in der nichtlinearen Spinortheorie / Electrodynamics in the Nonlinear Spinor Theory	604
53. Die Entwicklung der einheitlichen Feldtheorie der Elementarteilchen / The Development of the Unified Field Theory	605
54. The Present Situation in the Theory of Elementary Particles	610

55. Remarks on the 'Spurion'-Theory of Strange Particles	631
56. Strange Particles in the Nonlinear Spinor Theory (with H. P. Dürr)	634
57. Particles as Collective Stationary States	637
58. Survey on the Present Situation Concerning Unified Theories of Elementary Particles	643
59. Quantum Electrodynamics in the Nonlinear Spinor Theory	658
60. Introduction to the Unified Field Theory of Elementary Particles	677
Preface	678
Contents	680
Errata	683
The Important Experimental Facts	684
The Mathematical Tools	695
The Fundamental Field Equation	709
Methods of Approximation	730
Solution of the Simplest Eigenvalue Equations	749
Theory of Coupling Constants	763
Strange Particles	774
Quantum Electrodynamics	792
Relations of the Unified Field Theory to Phenomenological Theories	807
Concluding Remarks	817
Mathematical Appendix	820
Table	848
Notations and Conventions	849
References	853
Author Index	857
Subject Index	859
61. Nonlinear Problems in Physics	863
62. Report on the Present Situation in the Non-linear Spinor Theory of Elementary Particles	875
63. Review of Recent Progress	891
64. Bemerkungen zur neuen Tamm-Dancoff-Methode / Remarks on the New Tamm-Dancoff Method	901
65. Indefinite Metric in State Space	904
66. The Unified Field Theory of Elementary Particles: Some Recent Advances ..	912
67. The Nature of Elementary Particles	917
68. Cosmic Radiation and Fundamental Problems in Physics	928
Bibliographical Citation List	933
