PART I. INCEPTION THROUGH MID-AUGUST 1945	1
CHAPTER 1. INTRODUCTION	3
Objective and Organization	3
The April Conference	10
Program Development	17
CHAPTER 2. THE BRITISH MISSION.....	26
CHAPTER 3. GENERAL ADMINISTRATIVE MATTERS .	29
Laboratory Organization	29
Liaison	31
Personnel Administration	34
Other Administrative Functions	43
CHAPTER 4. TECHNICAL REVIEW, APRIL 1943 TO AUGUST 1944	64
Introduction	64
Nuclear Specifications of the Bomb	64
The Gun Method	67
The Implosion	67
Metallurgy	70
Chemistry	72
The Discovery of ^{240}Pu	73
The Water Boiler	74
CHAPTER 5. THE THEORETICAL DIVISION	76
Organization	76
Diffusion Problems	76
The Water Boiler	79
The Gun	80
The Implosion	80
Calculations	82
The Super	86
Damage	88
Experiments	89

CHAPTER 6. THE EXPERIMENTAL PHYSICS DIVISION, MARCH 1943 TO AUGUST 1944	90
Organization	90
Equipment	90
Preliminary Experiments	92
The Neutron Number	93
Spontaneous Fission Measurement	94
Energy Spectrum of Fission Neutrons	96
Fission Cross Sections	97
Capture Cross Sections, the "Branching Ratio"	100
Scattering Experiments for Tamper Selection	102
The Water Boiler	104
Miscellaneous Experiments	107
Instrumentation	108
CHAPTER 7. THE ORDNANCE DIVISION, JUNE 1943 TO AUGUST 1944	111
Organization and Liaison	111
Gun Design, Proving, and Interior Ballistics	113
Projectile and Target Design	117
Arming and Fusing	118
Engineering	121
Implosion Research	124
Delivery	130
CHAPTER 8. CHEMISTRY AND METALLURGY, MAY 1943 TO AUGUST 1944	134
Introduction	134
Uranium Purification	137
Uranium Metallurgy	138
Plutonium Purification	141
Plutonium Metallurgy	144
Miscellaneous Metallurgy	146
Radiochemistry	147
Analytical Methods	150
CHAPTER 9. GENERAL ADMINISTRATIVE MATTERS .	155
Reorganization	155
Conferences and Committees	156
Liaison	159
Administration	160

CHAPTER 10. TECHNICAL REVIEW, AUGUST 1944 TO AUGUST 1945	166
The Gun Program	166
The Plutonium Bomb	167
Theoretical and Experimental Physics	169
Chemistry and Metallurgy	170
The Trinity Test	170
CHAPTER 11. THE THEORETICAL DIVISION	172
Introduction	172
Diffusion Problems	173
The Gun	173
The Implosion	174
Efficiency	175
Damage	176
Experiments	176
CHAPTER 12. RESEARCH DIVISION	177
Introduction	177
Neutron Number Measurements	177
Spontaneous Fission Measurements	178
Fission Spectrum	178
Fission Cross Sections	179
Scattering Experiments	179
Multiplication Experiments	180
Other Integral Experiments	181
Miscellaneous Experiments	182
CHAPTER 13. F DIVISION	184
Introduction	184
The Super	184
Other Theoretical Topics	187
Deuterium and Tritium Reaction Cross Sections	188
The Water Boiler	189
Neutron Physics Experiments	190
CHAPTER 14. ORDNANCE DIVISION	191
Introduction	191
Gun Assembly	192
Arming and Fusing	195
Bomb Ballistics	195
Surface and Underwater Explosions	196

CHAPTER 15. WEAPON PHYSICS DIVISION	197
Introduction.....	197
Critical Assemblies	198
Implosion Studies	199
Initiators.....	204
Electric Detonators	205
Photography	206
Electronics	207
CHAPTER 16. EXPLOSIVES DIVISION	208
Organization and Liaison	208
Explosives Development and Production	211
Recovery Program	214
The Detonating System	215
Engineering, Testing, and Assembly	216
CHAPTER 17. CHEMISTRY AND METALLURGY	217
Introduction.....	217
Uranium Purification and Recovery	218
Uranium Metallurgy	219
Plutonium Purification	220
Plutonium Metallurgy	222
Miscellaneous Metallurgy	224
Radiochemistry	224
Analysis	227
DP Site	230
CHAPTER 18. PROJECT TRINITY.....	232
Pre-Trinity	232
Trinity Organization	234
Rehearsal Test	236
Preparations for the Trinity Test	237
Trinity.....	241
Results of Trinity Experiments	243
CHAPTER 19. PROJECT ALBERTA	247
Delivery Group	247
Organization and Tests	248
Destination.....	251
CHAPTER 20. CONCLUSION	259
PART 2. AUGUST 1945 THROUGH DECEMBER 1946	263

CHAPTER 21. GENERAL AND TECHNICAL REVIEW, OCTOBER 15, 1947	265
Necessity for Postwar Policy	265
Proposed Philosophies	267
Transition Period	267
Peacetime Activities Introduced	268
Health and Safety Program	270
Water Shortage	271
Technical Organization	271
Continuance of the Weapon Engineering Program	272
Operation Crossroads.....	273
CHAPTER 22. ADMINISTRATIVE ORGANIZATION	278
Introduction.....	278
Administrative Structure	278
Health Group	291
Business Office	294
CHAPTER 23. THEORETICAL PHYSICS DIVISION.....	304
Introduction.....	304
Organization	304
Effects of Test and Combat Nuclear Explosions	307
Radiation Hydrodynamics.....	307
The Super	307
Super Conference	308
Power-Producing Devices	308
CHAPTER 24. PHYSICS DIVISION	310
Formation of P Division	310
Physics Division Activities	311
Cockcroft-Walton Accelerator and Short Tank	317
CHAPTER 25. M DIVISION	323
Formation of M Division	323
General Responsibilities	324
CHAPTER 26. CHEMISTRY AND METALLURGY	
RESEARCH DIVISION	329
Division Organization	329
General Policy of CMR Research	330
Chemistry Activities	331
Metallurgical Developments	333
Plutonium Production	336
Health Instruments and Indoctrination	337

CHAPTER 27. EXPLOSIVES DIVISION	338
Organization of X Division	338
Detonation and Shock Phenomena	341
CHAPTER 28. ORDNANCE ENGINEERING (Z) DIVISION	342
Organization of Z Division	342
Z Division Program	343
Organization as of December 1946	346
CHAPTER 29. DOCUMENTARY DIVISION.....	347
Introduction.....	347
Formation of D Division	348
CHAPTER 30. CONCLUSION	353
APPENDIX A. BRADBURY'S PHILOSOPHY	356
APPENDIX B. GROVES-BRADBURY LETTER.....	368
APPENDIX C. CATALOGUE OF LOS ALAMOS UNIVERSITY COURSES AND STUDENT ENROLLMENT, SEPTEMBER 17, 1945	370
APPENDIX D. UNIVERSITY AFFILIATIONS CONFERENCE	380
APPENDIX E. NUCLEAR PHYSICS CONFERENCE PROGRAM, AUGUST 19-24, 1946	430
APPENDIX F. THE TECHNICAL SERIES	432
APPENDIX G. BRADBURY'S LETTER TO THE ATOMIC ENERGY COMMISSION, NOVEMBER 14, 1946	435
GLOSSARY	447
BIBLIOGRAPHY	451
NAME INDEX	457
SUBJECT INDEX	463
