Foreword (Freeman J. Dyson)	v
Preface (R.O. Wells, Jr.)	vii
Introduction	xi
PART I. Bernhard Riemann	1
1. Beginnings	3
2. Doctoral Dissertation.....	10
3. Riemann—Lecturer at Göttingen University	18
4. Riemann and Dirichlet.....	33
5. A Chair in Göttingen	51
6. Last Years	62
7. The Fate of Riemann's Work	64
Notes to Part I.....	68
Bibliography to Part I	70
PART II. Topological Themes in Contemporary Physics	71
1. Introduction	73
2. Topological Structures.....	76
3. The Connectivity of a Manifold and the Quantization of Magnetic Flux.....	88
4. Systems with Spontaneous Symmetry-Breaking	91
5. Topology and Liquid Crystals.....	95
6. The Theory of Gauge Fields	108
7. Topological Particles	125
8. Soliton Particles	130
9. What Next?	133
10. A Brief Historical Survey	134

Contents

Notes to Part II	137
Bibliography to Part II	138
Index.....	141
