PART I

Eugene Paul Wigner – A Biographical Sketch
By Jagdish Mehra 3

PART II

Applied Group Theory 1926–1935

Annotation by Brian R. Judd 17

On Noncombining Terms in the New Quantum Theory. Part I / Über nicht kombinierende Terme in der neueren Quantentheorie. Erster Teil 34

On Noncombining Terms in the New Quantum Theory. Part II / Über nicht kombinierende Terme in der neueren Quantentheorie. Zweiter Teil 43

Some Consequences of the Schrödinger Theory for the Term Structure / Einige Folgerungen aus der Schrödingerschen Theorie für die Termstrukturen 53

Correction to the Article: Some Consequences of the Schrödinger Theory for the Term Structure / Berichtigung zu der Arbeit: Einige Folgerungen aus der Schrödingerschen Theorie für die Termstrukturen 82

On the Conservation Laws in Quantum Mechanics / Über die Erhaltungssätze in der Quantenmechanik 84

On the Explanation of Some Properties of Spectra in the Quantum Mechanics of the Spinning Electron. Part I / Zur Erklärung einiger Eigenschaften der Spektren aus der Quantenmechanik des Drehelektrons. Erster Teil (with J. von Neumann) 91

On the Pauli Exclusion Principle / Über das Paulische Äquivalenzverbot (with P. Jordan) 109

On the Explanation of Some Properties of Spectra in the Quantum Mechanics of the Spinning Electron. Part II / Zur Erklärung einiger Eigenschaften der Spektren aus der Quantenmechanik des Drehelektrons. Zweiter Teil (with J. von Neumann) 130

On the Explanation of Some Properties of Spectra in the Quantum Mechanics of the Spinning Electron. Part III / Zur Erklärung einiger Eigenschaften der Spektren aus der Quantenmechanik des Drehelektrons. Dritter Teil (with J. von Neumann) 152
On the Structure of Diatomic Molecular Spectra in Quantum Mechanics / Über die Struktur der zweiatomigen Molekelspektren nach der Quantenmechanik (with E. E. Witmer) 167
On the Elastic Eigenvibrations of Symmetric Systems / Über die elastischen Eigenschwingungen symmetrischer Systeme 195
On a Sharpened Sum Rule / Über eine Verschärfung des Summensatzes 209
On the Operation of Time Reversal in Quantum Mechanics / Über die Operation der Zeitumkehr in der Quantenmechanik 213
On the Experimental Test of the Conservation Law of Spin / Über die experimentelle Prüfung des Spinerhaltungssatzes (with R. Döpel and K. Gailer) 227
Separation of Rotational Coordinates from the Schrödinger Equation for N Particles (with J. O. Hirschfelder) 229

Bibliography of Papers on Applied Group Theory 1926–1935 236

PART III

The Mathematical Papers

Annotation by George W. Mackey 241

On Remarkable Discrete Eigenvalues / Über merkwürdige diskrete Eigenwerte (with J. von Neumann) 291
On the Behavior of Eigenvalues in Adiabatic Processes / Über das Verhalten von Eigenwerten bei adiabetischen Prozessen (with J. von Neumann) 294
On an Algebraic Generalization of the Quantum Mechanical Formalism (with P. Jordan and J. von Neumann) 298
On Unitary Representations of the Inhomogeneous Lorentz Group 334
Minimally Almost Periodic Groups (with J. von Neumann) 390
On Representations of Certain Finite Groups 395
Localized States for Elementary Systems (with T. D. Newton) 402
On a Class of Analytic Functions from the Quantum Theory of Collisions 409
On the Connection Between the Distribution of Poles and Residues for an R Function and Its Invariant Derivative 441
Derivative Matrix and Scattering Matrix 453
Representations of the Galilei Group (with E. Inönü) 459
Simplified Derivation of the Properties of Elementary Transcendentals .. 473

On the Contraction of Groups and Their Representations (with E. Inönü) 488
On a Particular Type of Convergence to a Singular Matrix (with E. Inönü) 503
Application of the Rayleigh-Schrödinger Perturbation Theory to the Hydrogen Atom 506
Significance of Loewner's Theorem in the Quantum Theory of Collisions (with J. von Neumann) 508
Characteristic Vectors of Bordered Matrices with Infinite Dimensions I 524
Characteristic Vectors of Bordered Matrices with Infinite Dimensions II 541
On a Theorem of Magnus (with Edwin Hewitt) 546
Normal Form of Antiunitary Operators 551
Phenomenological Distinction Between Unitary and Antiunitary Symmetry Operators 556
On Weakly Positive Matrices 559
Unitary Representations of the Inhomogenous Lorentz Group Including Reflections 564
On the Matrices Which Reduce the Kronecker Products of Representations of S. R. Groups 608
Unimodular Matrices Homomorphic to Lorentz Transformations in $n \geq 2$ Spacelike Dimensions (with A. W. Sáenz) 655
On a Generalization of Euler's Angles 662
Condition That the Irreducible Representations of a Group, Considered as Representations of a Subgroup, Do Not Contain Any Representation of the Subgroup More Than Once 673
Orthogonalization Methods (with H. C. Schweinler) 679
Restriction of Irreducible Representations of Groups to a Subgroup 681
Condition That All Irreducible Representations of a Compact Lie Group, If Restricted to a Subgroup, Contain No Representation More Than Once (with F. E. Goldrich) 690
Reduction of Direct Products and Restriction of Representations to Subgroups: The Everyday Tasks of the Quantum Theorists 697

Bibliography of Mathematical Papers 714
