Philosophical Reflections and Syntheses Annotation by Gérard G. Emch	1
---	---

PART I

Epistemology of Quantum Mechanics

Discussion: Comments on Professor Putnam's Comments (with H. Margenau)	31
Two Kinds of Reality	33
Epistemology of Quantum Mechanics	48
Epistemological Perspective on Quantum Theory	55
Reality and Quantum Mechanics / Realität und Quantenmechanik	72
Interpretation of Quantum Mechanics	78
The Limitations of Determinism	133
The Nonrelativistic Nature of the Present Quantum Mechanical Measurement Theory	139

PART II

Quantum-Mechanical Measuring Process

The Measurement of Quantum-Mechanical Operators / Die Messung quantenmechanischer Operatoren	147
Theory of Quantum-Mechanical Measurement / Theorie der quanten- mechanischen Messung	155
The Problem of Measurement	163
Some Comments Concerning Measurements in Quantum Mechanics (with J.M. Jauch and M.M. Yanase)	181
On the Change of the Skew Information in the Process of Quantum-Mechanical Measurements (with A. Frenkel and M. Yanase)	189
The Subject of Our Discussions	199
The Philosophical Problem	218
Questions of Physical Theory	221

On Bub's Misunderstanding of Bell's Locality Argument (with S. Freedman)	223
Review of the Quantum-Mechanical Measurement Problem	225

PART III Consciousness

Remarks on the Mind-Body Question	247
The Place of Consciousness in Modern Physics	261
New Dimensions of Consciousness	268
The Existence of Consciousness	274

PART IV Symmetries

Invariance in Physical Theory	283
On the Law of Conservation of Heavy Particles	294
Symmetry and Conservation Laws	297
The Role of Invariance Principles in Natural Philosophy	311
Events, Laws of Nature, and Invariance Principles (Nobel address)	321
Events, Laws of Nature, and Invariance Principles	334
Violations of Symmetry in Physics	343
Symmetry Principles in Old and New Physics	359
Symmetry in Nature	382

PART V Relativity

Relativistic Invariance and Quantum Phenomena	415
Relativistic Equations in Quantum Mechanics	446

PART VI Nuclear Physics

On the Development of the Compound Nucleus Model	459
Summary of the Conference (Properties of Nuclear States, Montreal 1969)	476
Summary of the Conference (Polarization Phenomena, Madison 1971) ..	487
Introductory Talk (Statistical Properties of Nuclei)	494
Concluding Remarks (Symmetry Properties of Nuclei, Solvay Conference 1970)	508

PART VII
Broader Philosophical Essays

The Limits of Science	523
The Unreasonable Effectiveness of Mathematics in the Natural Sciences	534
The Growth of Science – Its Promise and Its Dangers	550
Physics and the Explanation of Life	564
On Some of Physics' Problems	578
Physics and Its Relation to Human Knowledge	584
The Problems, Future and Limits of Science	594
The Extension of the Area of Science	603
The Glorious Days of Physics	610
Some Problems of Our Natural Sciences	616
 Bibliography	 627
