| Preface | .. | .. | .. | .. | .. | .. | .. | ix |
|---------|----|----|----|----|----|----|----|----|

1. Some Preliminaries

| | | | | | | | | |
|------|--------------------------------|----|----|----|----|----|----|----|
| 1.1 | Newton's laws of motion | .. | .. | .. | .. | .. | .. | 1 |
| 1.2 | Coordinates | .. | .. | .. | .. | .. | .. | 2 |
| 1.3 | Accelerated coordinate systems | .. | .. | .. | .. | .. | .. | 3 |
| 1.4 | Rigid bodies | .. | .. | .. | .. | .. | .. | 4 |
| 1.5 | Constraints | .. | .. | .. | .. | .. | .. | 7 |
| 1.6 | Notations | .. | .. | .. | .. | .. | .. | 9 |
| 1.7 | Tensor calculus | .. | .. | .. | .. | .. | .. | 12 |
| 1.8 | A Cartesian coordinate system | .. | .. | .. | .. | .. | .. | 15 |
| 1.9 | The deviation equation | .. | .. | .. | .. | .. | .. | 18 |
| 1.10 | Killing's equation | .. | .. | .. | .. | .. | .. | 21 |
| | Problems 1 | .. | .. | .. | .. | .. | .. | 26 |

2. Lagrange Theory in V_n

| | | | | | | | | |
|-----|---|----|----|----|----|----|----|----|
| 2.1 | Derivation of Lagrange's equations | .. | .. | .. | .. | .. | .. | 30 |
| 2.2 | Further remarks on the derivation of the Lagrange equations | .. | .. | .. | .. | .. | .. | 32 |
| 2.3 | Properties of the Lagrange equations | .. | .. | .. | .. | .. | .. | 36 |
| 2.4 | Excess coordinates and quasi-coordinates | .. | .. | .. | .. | .. | .. | 40 |
| 2.5 | Variational methods | .. | .. | .. | .. | .. | .. | 46 |
| 2.6 | Kinetic foci | .. | .. | .. | .. | .. | .. | 52 |
| | Problems 2 | .. | .. | .. | .. | .. | .. | 53 |

Contents

3. Lagrange Theory in V_{n+1}

| | | |
|-----|---|----|
| 3.1 | The Lagrange equations | 58 |
| 3.2 | Coordinate transformations | 61 |
| 3.3 | Action waves | 63 |
| 3.4 | Action wave-length | 65 |
| 3.5 | The phase-function | 69 |
| 3.6 | Interpretation of the wave-function | 73 |
| | Problems 3 | 76 |

4. Hamiltonian Theory in V_{2n}

| | | |
|------|---|-----|
| 4.1 | Hamiltonian systems | 79 |
| 4.2 | The space V_{2n} | 85 |
| 4.3 | Poisson brackets | 86 |
| 4.4 | Dirac's use of Poisson brackets | 93 |
| 4.5 | Transformations: canonical theory | 95 |
| 4.6 | The generating functions | 97 |
| 4.7 | Equivalence of all conservative holonomic problems .. | 101 |
| 4.8 | The unfolding theorem | 103 |
| 4.9 | The Lagrange brackets | 104 |
| 4.10 | Reduction to canonical form | 107 |
| 4.11 | Physically significant V_{2n} 's | 110 |
| 4.12 | Conformal geometry of a V_{2n} | 112 |
| | Problems 4 | 114 |

5. Hamiltonian Theory in V_{2n+2} ; Integral Invariants

| | | |
|-----|---|-----|
| 5.1 | Equations of motion in V_{2n+2} | 118 |
| 5.2 | The Hamilton-Jacobi equation | 121 |
| 5.3 | A general method of integration | 125 |
| 5.4 | Integral invariants | 128 |
| 5.5 | Some invariants of the first and second order | 130 |
| 5.6 | Invariants of higher order | 134 |
| 5.7 | The variational equations | 138 |
| | Problems 5 | 141 |
| | Bibliography | 143 |
| | Index | 145 |
