

TABLE OF CONTENTS

Preface	IX
List of Principal Speakers	XI
List of Participants	XV

I. Fundamentals

E. STIEFEL/From the Theory of Numbers via Gyroscopes and Lie Algebras to Linear Celestial Mechanics	3
V. SZEBEHELY/Lectures on Linearizing Transformations of Dynamical Systems	17
G. CONTOPOULOS/Strongly Perturbed Dynamical Systems	43
C. DEWITT-MORETTE/Catastrophes in Lagrangian Systems - A An Example - B	57 67
L. REICHL/Statistical Behavior in Conservative Clas- sical Systems	71
J. H. BARTLETT/Global Stability of Area-Preserving Mappings	99
U. KIRCHGRABER/On the Method of Averaging	111
F. VERHULST/On the Theory of Averaging	119
N. SIGRIST/Qualitative Investigation of Almost Sepa- rable Hamiltonian System of Two Degrees of Freedom	141

II. Numerical and Statistical Analysis

J. BAUMGARTE/Stabilization, Manipulation, and Analytic Step Adaption	153
B. D. TAPLEY/On the Interpretation of Least Squares Collocation	165
S. J. AARSETH/A Note on Stabilization in Three-Body Regularization	173

III. Three and Many-Body Problems

C. MARCHAL/Qualitative Methods and Results in Celestial Mechanics	181
--	-----

R. BROUCKE/On the Characteristic Exponents of the General Three-Body Problem	209
J. D. HADJIDEMETRIOU/Families of Periodic Orbits in the General N-Body Problem	223
J. WALDVOGEL/Triple Collision	241
F. NAHON/An Invariant Measure for the Planar Restricted Three Body Problem	259
C. L. GOUDAS, A. A. HALIOULIAS, V. V. MARKELLOS, and G. MACRIS/Periodic Oscillations of the First Generation in the Störmer Problem	267

IV. Dynamics in Astronomy

P. J. MESSAGE/Formal Expressions for the Motion of N Planets in the Plane, with the Secular Variations Included, and an Extension to Poisson's Theorem	279
M. W. OVENDEN/The Principle of Least Interaction Action	295
R. O. VICENTE/Rotational Motions of the Terrestrial Planets	307
B. C. DOUGLAS/Long-Term Orbit Determination and Prediction for Geodynamic Investigations	321

V. Abstracts of Seminar-Contributions

G. ADOMIAN/Dynamical Systems Involving Uncertainty	329
P. A. BAXA/Periodic Orbits Around the Equilibrium Points of a Central Gravitational Potential Perturbed by the J_{22} Term	330
N. BORDERIES/Time Regularization and Stabilization of an Adams-Moulton-Cowell Algorithm	331
H. CLAES/On the Theory of an Artificial Satellite	333
J. R. DORMAND/The Evolution of Planetary Orbits in the Capture Theory of the Origin of the Solar System	334
B. C. DOUGLAS and C. C. GOAD/Geodynamic Investigations Using Very Long Term Observation of Near-Earth Satellites	335
T. FEAGIN/A New Transformation for the Perturbed Problem of Two Bodies	336
J. HENRARD/Kozai's Theory of an Artificial Satellite	337
H. KINOSHITA/Cassini's Laws	338
H. KINOSHITA/Theory of the Rotation of the Rigid Earth	339
V. V. MARKELLOS, S. KLIMOPOULOS, and C. L. GOUDAS/Periodic Oscillations of the Second Generation in the Störmer Problem	340
V. V. MARKELLOS and P. G. KAZANTZIS/Three-Dimensional Branchings of Plane Periodic Solutions	341
P. E. NACOZY/On Stabilization Using the Energy Integral	342

TABLE OF CONTENTS

VII

J. OSORIO/Resonance Effects in Satellite Orbits	344
J. ROELS/On the Resonance 1:1 for Hamiltonian Systems Near an Equilibrium Point	345
D. S. SCHMIDT/Periodic Orbits Near an Equilibrium Point: The Liapunov Center Theorem	346
C. SIMÓ/Analytical and Numerical Study of a Perturbed Pendulum	347
F. W. SPIRIG/Algebraical Aspects of Perturbation Theories	349
A. STOKES/Stabilization and Time Elements for Kepler's Problem	352
F. VERHULST/A Note on the Hénon-Heiles Problem	354
J. P. VINTI/Newtonian Cosmology with Varying G	356
K. ZARE/The Effects of Integrals on the Totality of Solutions of Dynamical Systems	358
