CONTENTS

Preface v

A New Approach to the Morse-Conley Theory 1
V. Benci

Morse Theory and Symmetry 53
F. Pacella

Dynamical Systems with Singular Potentials 75
A. Ambrosetti

Subharmonic Solutions of Prescribed Minimal Period for Non Autonomous Differential Equations 83
V. Benci & D. Fortunato

Example of Long Time Scales in Hamiltonian Dynamical Systems 97
G. Benettin

Remarks on Seifert's Problem and Nonlinear Complex Eigenvalues 119
H. Berestycki & J.-M. Lasry

Note on a Theorem of Conley and Zehnder 135
M.L. Bertotti

Generating Phase Functions and Hamiltonian Systems 147
M. Chaperon

Periodic Solutions of Second Order Hamiltonian Systems and Morse Theory 155
V. Coti Zelati

Periodic Solutions with Bouncing of Hamiltonian Problems and their Minimal Periods 163
F. Giannoni

Dual Variational Methods and Morse Index Theory for Periodic Solutions of Hamiltonian Systems 169
M. Girardi & M. Matzeu

Relations Between Global Invariants of Convex Contact Manifolds and Local Invariants of their Periodic Hamiltonian Trajectories 177
H. Hofer

Subharmonics with Prescribed Minimal Period for Hamiltonian Systems 205
R. Michaelek & G. Tarantello

Bifurcation of Invariant Tori for Non-Hamiltonian Systems 213
P. Negrini

On the Structure of the Largest Bifurcating Sets of Periodic Differential Systems 221
L. Salvadori

Forced Oscillations of Hamiltonian Systems 235
A. Salvatore
