

C O N T E N T S

LECTURES, SEMINARS, SHORT COMMUNICATIONS:

S. ALBEVERIO, R. HØEGH-KROHN, H. HOLDEN.	Random Fields with Values in Lie Groups and Higgs Fields	1
A. BARCHIELLI.	Stochastic Processes and Continual Measurements in Quantum Mechanics	14
J. BELLISSARD.	Stability and Chaotic Behavior of Quantum Rotators	24
G. BENETTIN.	Regular and Chaotic Motions near Resonances in Quasi- Integrable Hamiltonian Systems	39
M.V. BERRY.	Fluctuations in Numbers of Energy Levels	47
M.L. BERTOTTI, E. ZEHNDER.	A Poincaré-Birkhoff-Type Result in Higher Dimensions	54
Ph. BLANCHARD, Ph. COMBE, M. SIRUGUE, M. SIRUGUE-COLLIN.	Stochastic Jump Processes Associated with Dirac Equation	65
Ph. BLANCHARD, Ph. COMBE, M. SIRUGUE, M. SIRUGUE-COLLIN.	Jump Processes in Quantum Theories	87
Ph. BLANCHARD, Weian ZHENG.	Pathwise Conservation Law for Stationary Diffusion Processes	105
Ph. BLANCHARD, Weian ZHENG.	Stochastic Variational Principle and Diffusion Processes	109
O. BOHIGAS, M.-J. GIANNONI, Ch. SCHMIT.	Spectral Fluctuations, Random Matrix Theories and Chaotic Motion	118
E.A. CARLEN.	The Pathwise Description of Quantum Scattering in Stochastic Mechanics	139
U. CATTANEO.	Integral Representation of Covariant Observables	148
S.D. CHATTERJI.	Some Remarks on the Subsequence Principle in Probability Theory	154
G.F. DE ANGELIS.	A Route to Stochastic Mechanics	160
G.F. DE ANGELIS, D. DE FALCO, G. DI GENOVA.	Quantum Fields on a Gravitational Background from Random Fields on Riemannian Manifolds	170
J.D. DEUSCHEL, H. FOELLMER.	Time Reversal and Smoothing of Infinite- Dimensional Diffusion Processes	179
D. DÜRR, V. NARODITSKY, N. ZANGHI.	On the Motion of an Impurity in an Infinite Harmonic Crystal	187

G.O.S. EKHAGUERE. Quantum Stochastic Integration in Certain Partial *-Algebras	237
G. FELDER. A Non-Renormalizable Planar Field Theory	246
J. FRÖHLICH, Th. SPENCER, C.E. WAYNE. An Invariant Torus for Nearly Integrable Hamiltonian Systems with Infinitely Many Degrees of Freedom	256
L. GALGANI. The Problem of Energy Partition in the Light of Classical Perturbation Theory and the Possibility of Introducing a Critical Action in the Classical Theory of the Electromagnetic Field	269
G. GALLAVOTTI. On the φ_4^4 -Problem	278
S. GOLIN. Indeterminacy Relations in Stochastic Mechanics	296
Ch. GRUBER. Gibbs States and Spontaneous Symmetry Breakdown	306
Z. HABA. Stochastic Equations for Some Euclidean Fields	315
J. JEDRZEJEWSKI, A. KOMODA. A Class of Mean-Field-Like Models of Disordered Systems	329
S. JOHANNESEN, D. MERLINI. The Grand-Canonical Surface Tension and Its Convergence to the SOS Limit in the Two-Dimensional Ising Model ...	334
G. JONA-LASINIO. Stochastic Quantization	338
T. KOSKI, W. LOGES. On Measures of Information for Continuous Stochastic Processes	351
T. LINDSTRØM. Nonstandard Energy Forms and Diffusions on Manifolds and Fractals	363
C. MARCHIORO. Some Results on the Euler and Vlasov-Poisson Flows	381
J. MARION. Dirichlet Forms Defined by Riemannian Flags and Applications ...	386
F. MARTINELLI. A Rigorous Analysis of Anderson Localization	397
P.A. MEYER. A Finite Approximation to Boson Fock Space	405
N. MINAMI. An Extension of Kotani's Theorem to Random Generalized Sturm-Liouville Operators II	411
L.M. MORATO. Path-Wise Calculus of Variations in Stochastic Mechanics	420
M. NAGASAWA. Macroscopic, Intermediate, Microscopic and Mesons	427
E. NELSON. Field Theory and the Future of Stochastic Mechanics	438
T.F. NONNENMACHER. Hamiltonian Models for the Madelung Fluid and Generalized Langevin Equations	470
C.-A. PILLET. Quantum Mechanics with Stochastic Time Dependent Potentials .	481
A. POLITI, G.L. OPPO, R. BADII. Coexistence of Attracting and Conservative Features in Reversible Dynamical Systems	486
T. SCHNEIDER. Relationship Between Dynamic, Quantum and Classical Critical Phenomena	491

W.R. SCHNEIDER. Stable Distributions: Fox Function Representation and Generalization	497
P. VENZI. The Geodesic Mappings in Riemannian and Pseudo-Riemannian Manifolds	512
J.-C. ZAMBRINI. Variational Processes	517

SPECIAL LECTURES:

K. HEPP. Levels of Structure and Function in Neurobiology	533
E. NELSON. Forma Matematica e Realtà Fisica	545
/	
LIST OF PARTICIPANTS	551

The following lectures given at the Meeting will appear elsewhere:

- G. CASATI. Quantum Chaos
- D. CASTRIGIANO. Quantum Oscillator in a Non-Selfinteracting Radiation Field: Exact Calculation of the Partition Function
- J. FRÖHLICH. Random Surface Phenomena in Statistical Mechanics and Particle Theory
- V. GORINI. Gravitational Lenses
