
CONTENTS

Preface	xii
1 Some Preliminary Thoughts	1
1.1 Hypersonic Flight—Some Historical Firsts	2
1.2 Hypersonic Flow—Why is it Important?	4
1.3 Hypersonic Flow—What is it?	13
A Thin Shock Layers	14
B Entropy Layer	14
C Viscous Interaction	15
D High-Temperature Flows	17
E Low-Density Flow	20
F Recapitulation	23
1.4 Hypersonic Flight Paths; the Velocity-Altitude Map	24
1.5 Summary and Outlook	26
Problems	28

Part I Inviscid Hypersonic Flow

2 Hypersonic Shock and Expansion-Wave Relations	31
2.1 Introduction	32
2.2 Basic Hypersonic Shock Relations	33
2.3 Hypersonic Shock Relations in Terms of the Hypersonic Similarity Parameter	38
2.4 Hypersonic Expansion-Wave Relations	40
2.5 Summary	43
Problem	44

3	Local Surface Inclination Methods	45
3.1	Introduction	46
3.2	Newtonian Flow	46
3.3	Modified Newtonian Law	53
3.4	Centrifugal Force Corrections to Newtonian Theory	56
3.5	Newtonian Theory—What it Really Means	62
3.6	Tangent-Wedge/Tangent-Cone Methods	66
3.7	Shock-Expansion Method	70
3.8	Summary and Comment	74
	Problems	75
4	Hypersonic Inviscid Flowfields: Approximate Methods	76
4.1	Introduction	77
4.2	The Governing Equations	77
4.3	Mach Number Independence	78
4.4	The Hypersonic Small-Disturbance Equations	83
4.5	Hypersonic Similarity	89
4.6	Hypersonic Small-Disturbance Theory: Some Results	100
4.7	A Comment on Hypersonic Small-Disturbance Theory	116
4.8	The Hypersonic Equivalence Principle and Blast Wave Theory	117
4.9	Thin Shock-Layer Theory	138
4.10	Summary and Comments	145
	Problems	147
5	Hypersonic Inviscid Flowfields: Exact Methods	148
5.1	General Thoughts	149
5.2	Method of Characteristics	150
5.3	The Hypersonic Blunt-Body Problem	166
5.4	Correlations for Hypersonic Shock-Wave Shapes	189
5.5	Modern Computational Hypersonics: Additional Solutions of the Euler Equations	192
5.6	Summary, and Comments on the State of the Art	207
5.7	A Final Comment	209
	Problems	209

Part II Viscous Hypersonic Flow

6	Viscous Flow: Basic Aspects, Boundary Layer Results, and Aerodynamic Heating	213
6.1	Introduction	214
6.2	Governing Equations for Viscous Flow: The Navier-Stokes Equations	217
6.3	Similarity Parameters and Boundary Conditions	219
6.4	The Boundary Layer Equations for Hypersonic Flow	222

6.5	Hypersonic Boundary Layer Theory: Self-Similar Solutions	228
	Flat Plate Case	237
	Stagnation Point Case	250
	Summary	258
6.6	Nonsimilar Hypersonic Boundary Layers	259
	Local Similarity Method	260
	Difference-Differential Method	263
	Finite-Difference Method	266
6.7	Hypersonic Transition	271
6.8	Hypersonic Turbulent Boundary Layer	280
6.9	The Reference Temperature Method	286
6.10	Hypersonic Aerodynamic Heating: Some Comments and Approximate Results Applied to Hypersonic Vehicles	288
6.11	Entropy Layer Effects on Aerodynamic Heating	295
6.12	Summary	297
	Problems	300
7	Hypersonic Viscous Interactions	301
7.1	Introduction	302
7.2	Strong and Weak Viscous Interactions: Definition and Description	305
7.3	The Role of $\bar{\chi}$ in Hypersonic Viscous Interaction	307
7.4	Other Viscous Interaction Results	315
7.5	Hypersonic Shock-Wave/Boundary Layer Interactions	321
7.6	Summary	332
	Problems	333
8	Computational Fluid Dynamic Solutions of Hypersonic Viscous Flows	335
8.1	Introduction	336
8.2	Viscous Shock-Layer Technique	337
8.3	Parabolized Navier-Stokes Solutions	344
8.4	Full Navier-Stokes Solutions	353
8.5	Summary and Comments	360

Part III High-Temperature Gas Dynamics

9	High-Temperature Gas Dynamics: Some Introductory Considerations	363
9.1	The Importance of High-Temperature Flows	364
9.2	The Nature of High-Temperature Flows	372
9.3	Chemical Effects in Air: The Velocity-Altitude Map	373
9.4	Summary and Comments	376

10	Some Aspects of the Thermodynamics of Chemically Reacting Gases (Classical Physical Chemistry)	377
10.1	Introduction: Definition of Real Gases and Perfect Gases	378
10.2	Various Forms of the Perfect Gas Equation of State	379
10.3	Various Descriptions of the Composition of a Gas Mixture	385
10.4	Classification of Gases	387
10.5	The First Law of Thermodynamics	391
10.6	The Second Law of Thermodynamics	395
10.7	The Calculation of Entropy	397
10.8	Gibbs Free Energy, and the Entropy Produced by Chemical Nonequilibrium	399
10.9	Composition of Equilibrium Chemically Reacting Mixtures: The Equilibrium Constant	402
10.10	Heat of Reaction	409
10.11	Summary	410
	Problems	412
11	Elements of Statistical Thermodynamics	413
11.1	Introduction	414
11.2	Microscopic Description of Gases	415
11.3	Counting the Number of Microstates for a Given Macrostate	423
11.4	The Most Probable Macrostate	425
11.5	The Limiting Case: Boltzmann Distribution	428
11.6	Evaluation of Thermodynamic Properties in Terms of the Partition Function	430
11.7	Evaluation of the Partition Function in Terms of T and V	435
11.8	Practical Evaluation of Thermodynamic Properties for a Single Chemical Species	438
11.9	The Calculation of the Equilibrium Constant	443
11.10	Chemical Equilibrium—Some Further Comments	448
11.11	Calculation of the Equilibrium Composition for High- Temperature Air	449
11.12	Thermodynamic Properties of an Equilibrium Chemically Reacting Gas	453
11.13	Equilibrium Properties of High-Temperature Air	457
11.14	Summary	465
	Problems	467
12	Elements of Kinetic Theory	468
12.1	Introduction	469
12.2	The Perfect Gas Equation of State (Revisited)	469
12.3	Collision Frequency and Mean Free Path	473
12.4	Velocity and Speed Distribution Functions: Mean Velocities	476
12.5	Summary	480
	Problems	481

13	Chemical and Vibrational Nonequilibrium	482
13.1	Introduction	483
13.2	Vibrational Nonequilibrium: The Vibrational Rate Equation	484
13.3	Chemical Nonequilibrium: The Chemical Rate Equation	491
13.4	Chemical Nonequilibrium in High-Temperature Air	495
13.5	Chemical Nonequilibrium in H ₂ -Air Mixtures	501
13.6	Summary	501
14	Inviscid High-Temperature Equilibrium Flows	503
14.1	Introduction	504
14.2	Governing Equations for Inviscid High-Temperature Equilibrium Flow	504
14.3	Equilibrium Normal and Oblique Shock-Wave Flows	507
14.4	Equilibrium Quasi-One-Dimensional Nozzle Flows	520
14.5	Frozen and Equilibrium Flows: The Distinction	527
14.6	Equilibrium and Frozen Specific Heats	530
14.7	Equilibrium Speed of Sound	533
14.8	Equilibrium Conical Flow	536
14.9	Equilibrium Blunt-Body Flows	542
14.10	Summary and Comments	546
	Problems	547
15	Inviscid High-Temperature Nonequilibrium Flows	548
15.1	Introduction	549
15.2	Governing Equations for Inviscid, Nonequilibrium Flows	550
15.3	Nonequilibrium Normal and Oblique Shock-Wave Flows	555
15.4	Nonequilibrium Quasi-One-Dimensional Nozzle Flows	563
15.5	Nonequilibrium Blunt-Body Flows	571
15.6	Binary Scaling	580
15.7	Nonequilibrium Flow Over Other Shapes: Nonequilibrium Method of Characteristics	583
15.8	Summary and Comments	589
	Problems	590
16	Kinetic Theory Revisited: Transport Properties in High-Temperature Gases	591
16.1	Introduction	592
16.2	Definition of Transport Phenomena	592
16.3	Transport Coefficients	596
16.4	The Mechanism of Diffusion	600
16.5	Energy Transport by Thermal Conduction and Diffusion: Total Thermal Conductivity	602
16.6	Transport Properties for High-Temperature Air	605
16.7	Summary	609

17	Viscous High-Temperature Flows	610
17.1	Introduction	611
17.2	Governing Equations for Chemically Reacting Viscous Flow	611
17.3	Alternate Forms of the Energy Equation	614
17.4	Boundary Layer Equations for a Chemically Reacting Gas	618
17.5	Boundary Conditions: Catalytic Walls	623
17.6	Boundary Layer Solutions: Stagnation Point Heat Transfer for a Dissociating Gas	626
17.7	Boundary Layer Solutions: Nonsimilar Flows	636
17.8	Viscous Shock Layer (VSL) Solutions to Chemically Reacting Flow	639
17.9	Parabolized Navier-Stokes (PNS) Solutions to Chemically Reacting Flows	646
17.10	Full Navier-Stokes Solutions to Chemically Reacting Flows	648
17.11	Summary and Comments	652
	Problems	652
18	Introduction to Radiative Gas Dynamics	653
18.1	Introduction	654
18.2	Definitions of Radiative Transfer in Gases	655
18.3	The Radiative Transfer Equation	657
18.4	Solutions of the Radiative Transfer Equation: Transparent Gas	659
18.5	Solutions of the Radiative Transfer Equation: Absorbing Gas	662
18.6	Solutions of the Radiative Transfer Equation: Emitting and Absorbing Gas	664
18.7	Radiating Flowfields: Sample Results	667
18.8	Summary	674
	Problems	674
	Postface	676
	References	677
	Index	687
