PREFACE	xi
ACKNOWLEDGEMENTS	xiii
LIST OF SYMBOLS	xiv
1 INTRODUCTION	1
1.1 Types of Waves	1
1.2 The Earth's Atmosphere	12
Introduction	12
Thermodynamic Equations	14
The Barometric Equation and the Scale Height	16
Geopotential Altitude	18
Atmosphere with Constant Temperature Gradients	19
1.3 Atmospheric Wave Observations	21
Microbarographic Observations	21
Gravity Waves in the Ionosphere	24
Noctilucent Clouds	27
1.4 Compressible Fluid Dynamics	29
Vaisala–Brunt Frequency	30
The Equations of Motion	34
Coriolis Force	35
Thermal Wind Equation	38
2 THEORY OF ATMOSPHERIC WAVES	42
2.1 Introduction	42
2.2 Rossby Waves	44
2.3 Isothermal, Windless Case	50
2.4 Internal Waves	54

2.5	Constant Horizontal Wind	59
2.6	Wind Divergence Equation	67
2.7	Energy Densities and the Lagrangian	69
2.8	Polarization Relations	73
	Complex Polarization Terms	78
2.9	Phase and Group Velocity	78
2.10	External Waves	81
2.11	Boundary Waves	87
3	WAVES IN REAL ATMOSPHERES	91
3.1	Introduction	91
3.2	Turbulence	91
3.3	Viscosity	96
3.4	Acoustic Wave Attenuation	106
3.5	The Radiation Condition	109
3.6	Thermal Conduction	111
	Viscosity and Thermal Conduction Waves	112
3.7	Reflection	113
3.8	Ducting	120
	Inverse Dispersion	125
	Coupling	125
3.9	Winds	127
4	WAVES IN THE LOWER ATMOSPHERE	132
4.1	Vorticity	132
4.2	Filtering	135
	Computational Instability	135
	Incompressible Fluid Dynamics	138
4.3	Planetary Waves	143
	Associated Legendre Polynomials	150
	Equivalent Depth	158
4.4	Tropical Wave Disturbances	160

4.5 Barotropic and Baroclinic Instability	165
Barotropic Instability	165
Baroclinic Instability	167
4.6 Mountain Waves	173
Rotational Effects	174
Vertical motions	176
Wave Clouds	180
Prediction	185
The Foehn	185
4.7 Clear Air Turbulence (CAT)	186
5 ATMOSPHERIC TIDES	191
5.1 Introduction	191
5.2 Theory	193
Laplace's Tidal Equation	196
Vertical Structure Equation	200
Resonance Theory	203
5.3 Tides at the Earth's Surface	207
Solar Semidiurnal Tide	207
Solar Diurnal Tide	210
Lunar Semi-Diurnal Tide	211
Other Modes	213
5.4 Tides above the Ground	213
5.5 Tides in the Upper Atmosphere	219
5.6 Dynamo Effects	223
Theory	223
S _q and L current systems	230
5.7 Tides in Real Atmospheres	233
Neglect of Winds and Horizontal Temperature Gradients	233
Dissipation	235
Lorentz Forces	236
Topographic Effects	237
6 WAVES IN THE IONOSPHERE	238
6.1 Introduction	238
Temperature Variations	240

6.2 Waves in the D Region	241
6.3 Waves in the E Region	243
Sporadic E	245
Further Effects	247
Winds in the E Region	248
6.4 Waves in the F Region	249
Very Large TID's	250
Medium Scale TID's	251
Random Fluctuations	252
Ion Drag	253
Observations of Gravity Waves	255
6.5 Drift Motion of Irregularities	255
The MCKT Rule	256
6.6 Ionization—Gravity Wave Interaction	258
F Region	260
Approximate Polarization Relations	261
Exact Solutions of the Continuity Equation	265
Large-scale Diurnal Variations	266
6.7 Spatial Resonance	268
The Pousse-Café Effect	270
 7 NON LINEAR EFFECTS	273
7.1 Sources	273
Planetary Waves	274
Atmospheric Tides	275
Acoustic and Gravity Waves	275
7.2 Resonant Triads	277
Resonant Interaction	278
7.3 Instability	279
 REFERENCES	283
