<i>Contents of Volume I</i>	ix
<i>Preface</i>	xi
<i>Organization of the Book</i>	xv
<i>List of Symbols</i>	xvii

7 Hydrodynamically Induced Cavitation and Bubble Noise

7.1	Introductory Concepts: The Cavitation Index and Cavitation Similitude	428
7.2	Hydrodynamic Cavitation Noise and Inception	430
7.3	Measurements of Sounds from Cavitation in Turbulent Jets, Wakes, and Hydrofoils	451
7.4	Propeller Cavitation	460
7.5	Sounds from Linear Bubble Motions	473
7.6	Splash Noise	481
	References	491

8 Essentials of Turbulent Wall-Pressure Fluctuations

8.1	Introduction	497
8.2	Equilibrium Boundary Layers	499
8.3	Theories of Wall Pressures Related to the Turbulence Structure	507
8.4	Pressure Fluctuations beneath Equilibrium Wall Layers	533
8.5	Spatial Filtering by Transducers, Transducer Arrays, and Flexible Panels	562
8.6	Pressure Fluctuations beneath Nonequilibrium Wall Layers	578

Appendix: Derivation of Equation (8-25)	587
References	588
 9 Structural Response to Turbulent Wall Flow and Random Sound	
9.1 Flow-Excited Structural Vibration	595
9.2 Sound from Flow-Induced Vibration	615
9.3 General Rules for Hydroacoustic Similarity and Noise Control	620
9.4 Further Consideration of Wall Pressures at Low Wave Numbers	626
9.5 Direct Acoustic Radiation from Turbulent Boundary Layers	632
9.6 Practical Significance of Boundary Layer Noise: Summary	644
9.7 Extensions of This Chapter to Excitation by Reverberant Sound Fields	646
References	654
 10 Noise Radiation from Pipe and Duct Systems	
10.1 Overview of the Noise Radiation from Fluid Conduits	659
10.2 Elements of the Structural Acoustics of Cylindrical Shells	664
10.3 Noise from Turbulent Pipe Flow	674
10.4 Sound Transmission through Pipe and Duct Walls	677
10.5 Aerodynamic Sound Generation by Valves and Throttling Devices	690
10.6 Cavitation Noise in Valves	712
References	715
 11 Noncavitating Lifting Sections	
11.1 Introduction	718
11.2 Overview of Flow-Induced Noise Sources	719
11.3 Forces and Sound due to Inflow Unsteadiness	735
11.4 Flow Regimes Affecting Trailing Edge Noise	756
11.5 Acoustic Tones from Vortex Shedding by Rigid Surfaces	778
11.6 Sound from Effectively Rigid Turbulent-Flow Airfoils	782
11.7 Flow-Induced Vibration and Singing	806
References	829
 12 Noise from Rotating Machinery	
12.1 Introduction	837
12.2 Elementary Acoustics of Rotating Machinery	839

CONTENTS	vii
12.3 Design Parameters of Rotors as Lifting Surfaces	851
12.4 Theoretical Free-Field Acoustics of Rotors	864
12.5 Self-Noise from Axial-Flow Machinery	885
12.6 Interaction Noise and Loading Functions in Axial-Flow Machines	908
12.7 Elementary Considerations for Enclosed Rotors and Centrifugal Fans	940
References	953
<i>Index</i>	961
